

Is spicethemes.com legit? TrustSniffer's high-trust assessment: 96/100

spicethemes.com

Verdict

96

OUT OF 100

HIGH TRUST

spicethemes.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 55%.

What this site appears to be

SpiceThemes is a commercial WordPress theme vendor advertising responsive premium themes, customization features, demos, customer testimonials, support, documentation, and related web tools. The page describes a clear, ordinary software-product sales model and shows no strong evidence of phishing or financial fraud.

Evidence status and limitations

Evidence completeness: UNKNOWN

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

SpiceThemes is an established commercial WordPress vendor offering premium themes, extensions, customization, support, and website-development services through a conventional ecommerce model, with downloadable products and optional support renewal.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or other material fraud signals were observed. The homepage presents a coherent catalogue of named WordPress products, including BusiCare Plus, CloudPress Pro, HoneyPress Pro, Innofit Plus, and SpicePress Pro, while the observed browser behaviour showed no hidden forms, credential forwarding, wallet interaction, clipboard hijacking, cloaking, or suspicious inline scripts. The long-established domain, substantial global traffic footprint, and clean threat-reputation results strongly support the conclusion that this is the authentic operating website rather than a disposable or imitative storefront.

- The domain registration record shows registration on 2017-01-23 (~9.52 years old), through NameCheap, Inc., with expiry on 2027-01-23.
- The homepage identifies the service as “Spice Themes - Premium Wordpress Themes for your Business” and presents a consistent theme catalogue under the SpiceThemes brand.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no external blacklist finding, and a global traffic rank of 30,714.
- Interactive testing of the homepage completed successfully across 2 runs, with 0 hidden forms, 0 externally submitted password forms, 0 suspicious inline scripts, and no cloaking detected.

Regulatory Verification Notes

The observed business is a software-product vendor rather than a financial, investment, brokerage, or cryptocurrency service, and the website makes no claim in the supplied evidence that would ordinarily require financial-services licensing. Its stated commercial arrangement is clear: customers purchase downloadable WordPress software, receive one year of support, and may renew that support voluntarily. The available page material does not establish the contents of dedicated corporate, contractual, refund, or privacy disclosures, so no conclusion about those documents is warranted from this evidence alone.

- The homepage describes premium WordPress themes as responsive, mobile-friendly, SEO-oriented, translatable, customizable, and available with one-click installation.

- The homepage states that theme purchases include 1 year of free support and that renewal for another year is optional.
- The site's transport encryption uses a valid domain-validated certificate issued by YE2, valid to 2026-09-02.
- The observed homepage contained no sensitive form and no form submitting data to an untrusted destination.

What to Verify Next

Before procurement, an enterprise customer should review the applicable theme license, renewal terms, refund policy, privacy terms, update commitments, and support service levels. Technical purchasers should also confirm current WordPress and PHP compatibility, supported plugins, maintenance cadence, and entitlement to security updates for the intended deployment. Official contact channels should be confirmed through the site's published contact and support areas before establishing a contractual relationship.

- The site navigation exposes Pricing, Extensions, Themes, Support, Login, Contact, and Hire Us areas for commercial and operational due diligence.
- The homepage advertises documentation, demonstrations, customization capabilities, and support services that can be tested against procurement requirements.
- The site runs on WordPress, making version compatibility, update delivery, and third-party plugin interoperability relevant deployment checks.

Summary Verdict

SpiceThemes is a legitimate, established, and trustworthy commercial website. Its consistent identity, ordinary software-sales model, established market presence, clean external reputation, and benign observed behaviour converge on a high-confidence assessment suitable for normal interaction.

Infrastructure Integrity

The website is protected by Cloudflare's mainstream CDN/WAF infrastructure; all observed addresses were edge systems, which reduces direct exposure of the origin server but is a security mitigation rather than independent proof of legitimacy.

- The hosting infrastructure served the site from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US) at the observed edge address 162.159.134.42.
- One Cloudflare edge address was observed, with no origin-server candidate exposed during the assessment.

Closing Assessment

Prospective users may proceed with normal browsing, account login, purchases, and standard use, applying ordinary software-procurement and deployment controls appropriate to third-party WordPress components.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of spicethemes.com.

- The request stayed on spicethemes.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under NameCheap, Inc.. [CLEAR](#)
- DNS for this domain is served by awsdns-02.org, across 4 name servers. [NOTED](#)
- The registration is paid up to 2027-01-23. [NOTED](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about spicethemes.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
