Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Greek-language online retailer offering bed linens, home décor, furniture, and household goods through a conventional ecommerce storefront supported by payment, reviews, analytics, advertising, and cookie-consent functionality.

Scam/Impersonation Risk

No contradictions, phishing indicators, impersonation signals, or page-level red flags were observed. The business presentation is coherent with a direct-to-consumer home-goods retailer, and the site's established historical continuity and clean external reputation support legitimacy rather than an abuse-oriented explanation.

EVIDENCE

- Domain established in 2013; authoritative domain age recorded as 13.147 years.
- 171 archive snapshots spanning 2013-06-09 to 2026-05-12, covering 14 tracked years.
- The homepage identifies the business as a retailer of household goods, décor, furniture, and linens, with no detected brand-impersonation indicators.

Regulatory Verification Notes

The site appears to operate as an ordinary ecommerce merchant rather than presenting a regulated financial or investment service. No regulated-service license is claimed in the reviewed content; this is a transparency item for ordinary merchant verification, not evidence of deception. The available third-party reputational context contained no broker match or adverse finding.

EVIDENCE

- Hosted on AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- TLS certificate issued by Thawte TLS RSA CA G1, using DV validation, valid to 2027-01-06.
- The homepage provides cookie-consent controls and identifies payment, review, analytics, and advertising functionality.

What to Verify Next

For a material purchase, confirm the merchant identity, delivery and refund terms, and applicable consumer disclosures on the site's legal or checkout pages. Payment details and order confirmations should be retained as part of normal transaction governance.

EVIDENCE

- The homepage presents direct online sales of household goods and furnishings.
- The storefront includes payment integrations, product reviews, and consent-management controls.
- The site links to established social platforms including YouTube, Pinterest, and TikTok.

Summary Verdict

The website has an established, legitimate ecommerce posture with strong convergence across its identity, content, historical continuity, reputation, and technical signals. Normal interaction, including account login and standard transactions, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare's CDN and WAF, with observed traffic terminating on Cloudflare edge infrastructure at 172.66.167.153 and 104.20.42.92; the origin server was not observable. This materially reduces direct origin exposure and is a mitigating infrastructure signal, not independent proof of legitimacy.

Closing Assessment

Standard browsing, login, purchasing, and account activity are appropriate, subject to ordinary review of order terms and retention of transaction records for significant purchases.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of spitishop.gr.

- The request stayed on spitishop.gr. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2013-06-09. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about spitishop.gr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
