Full analysis

Overview

Sport-Shop.pl is an established Polish online storefront for sports equipment and outdoor tourism products, presenting conventional shopping-cart and session functionality for ordinary ecommerce sales, with supporting analytics, advertising, affiliate, and embedded-media services.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence. The homepage presents a conventional ecommerce model without phishing indicators, brand impersonation, financial manipulation, cryptocurrency features, hidden forms, or suspicious destinations. Its long-running domain and continuous historical presence further support continuity of the same general web identity.

- The homepage is classified as an ecommerce storefront for sports and tourism products, with no reported red flags.
- The domain was created on 2004-10-18 and is approximately 21.8 years old; registration is through Aftermarket.pl Limited.
- Archive coverage records 1,258 snapshots spanning 2004–2026, covering 23 years with a maximum observed gap of one year.

Regulatory Verification Notes

The site appears to operate as an ordinary retail business rather than presenting itself as a regulated financial service. The supplied content does not show a license claim or license number, so regulatory authorization is not applicable or established from the available pages; this is a limited disclosure point, not evidence of deception. The available external reputation signals are clean, and no broker-related match was identified.

- The homepage describes ordinary sports and tourism ecommerce rather than a regulated financial product.
- The site's external checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing result.
- The site is served from AS13335, Cloudflare, Inc.; its TLS certificate is issued by WE1 at DV level and valid to 2026-09-18T22:41:06+00:00.

What to Verify Next

For a material purchase, confirm the merchant's current legal name, returns process, payment terms, and consumer-protection information on the applicable legal and checkout pages. Where a regulated service is ever presented separately from the retail offering, licensing should be checked against the relevant official registry.

- The homepage supports shopping-cart functionality and ordinary product sales.
- The supplied page content contains consent-managed analytics, advertising, affiliate, and embedded-media processing.
- No license claim or license number is recorded in the supplied business-model evidence.

Summary Verdict

Sport-Shop.pl presents as a legitimate, established, and trustworthy ecommerce website with a coherent business purpose and no observed impersonation, phishing, or malicious-reputation indicators. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with all observed addresses belonging to CDN edge servers and no origin candidate identified. This provides a meaningful exposure-mitigation layer, although protective hosting infrastructure alone is not proof of legitimacy.

Closing Assessment

Standard browsing, account use, and ordinary purchasing may proceed under the site’s stated terms, with routine commercial diligence applied to significant transactions.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sport-shop.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
