

Is squidapp.co legit? TrustSniffer's high-trust assessment: 100/100

squidapp.co

Verdict

100

OUT OF 100

HIGH TRUST

squidapp.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate landing page for SQUID news app (Njuice AB). Promotes the mobile news app, advertising product (SQUID Ads), global availability, and contains extensive consent/TCF vendor lists. No signs of phishing or financial investment solicitations.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

SQUID is a corporate landing site for a news-aggregation mobile application operated under the name Njuice AB. It presents personalized news from multiple publishers, access to coverage from more than 60 countries and local languages, and an advertising business called SQUID Ads that connects brands with mobile users.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent news and advertising business model rather than investment, lending, cryptocurrency, or other financial solicitation activity. Page analysis found no phishing indicators, login form, hidden form, brand-impersonation signal, or suspicious browser behavior; the site's stated purpose and observed functionality are consistent. The available evidence supports an apparently legitimate, low-risk website, while the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage describes SQUID as a personalized news application with content from multiple publishers and availability across more than 60 countries.
- The homepage promotes SQUID Ads and publisher, partner, advertiser, and content-creator relationships rather than financial products.
- The domain was registered on 2015-05-11 and is approximately 11.27 years old through the observed registration continuity.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing or blacklist contradiction observed.

Regulatory Verification Notes

The site identifies Njuice AB in its corporate presentation and provides About, Contact, Privacy Policy, and Terms of Use pages. Its commercial model is advertising-supported news aggregation and mobile app distribution, so the supplied evidence does not indicate a financial-services licensing claim; nevertheless, the available disclosure state is unclear and the operator's legal identity is not independently verified. Privacy and consent controls are comparatively visible, including an extensive consent-management and vendor disclosure interface. A separate broker-reputation dataset produced no match, which is contextual support only and not a licensing or regulatory determination.

EVIDENCE

- The About and homepage content identify the business as SQUID News App and associate it with Njuice AB.
- The homepage exposes links to Privacy Policy, Terms of Use, About, Contact, publisher, partner, advertiser, and content-creator pages.
- The site is hosted on AS16509, Amazon.com, Inc. (AMAZON-02 - Amazon.com, Inc., US).
- The site uses a DV TLS certificate issued by YE1, valid through 2026-09-25.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that Njuice AB is the entity responsible for the service, review the applicable Terms of Use and privacy disclosures, and confirm that any app download or commercial engagement is obtained through the organization's recognized distribution or contracting channel. For advertising or publishing arrangements, counterparties should validate the business contact and contractual details through an independent route and confirm applicable payment-protection provisions.

EVIDENCE

- The homepage provides dedicated Contact, About, Terms of Use, and Privacy Policy pathways for independent review.
- The site links to Facebook, LinkedIn, TikTok, and Instagram profiles, providing additional channels for cross-checking the public business presence.
- The only detected form is a consent-management form; no sensitive submission form was observed.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. The conclusion is strong at the site-risk level, but it does not independently prove the real-world operator identity.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, with the observed address serving as an edge endpoint and no origin server candidate exposed in the analysis. This is a positive mitigating control that reduces direct origin exposure, although protective hosting alone is not proof of legitimacy.

Closing Assessment

Normal browsing and ordinary service evaluation are proportionate, while independent entity, policy, and payment-protection checks should precede credential submission or payment activity.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of squidapp.co.

- The request stayed on squidapp.co. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-37.com, across 4 name servers. NOTED
- The registration is paid up to 2027-05-10. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about squidapp.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
