Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Russian online-education platform offering higher-education programs, professional retraining, and short courses in psychology, film and television, nutrition, coaching, and career development, supported by consultation, enrollment, free-course, newsletter, and installment-payment pathways.

Scam/Impersonation Risk

No identity contradictions, phishing behavior, brand impersonation, or other scam indicators were observed. The site's long-established domain, continuous historical presence, conventional educational content, stable behavior, and clean external reputation converge strongly in favor of authenticity. Its forms perform recognizable enrollment and lead-generation functions, with no hidden forms, external password submission, cloaking, wallet interaction, or untrusted form destination detected.

- The domain was registered in 2016 and is approximately 10.16 years old; the registration is maintained through REGTIME-RU and expires on 3 June 2027.
- The web archive contains 357 snapshots spanning 20 December 2016 to 11 May 2026, covering 11 tracked years with no detected semantic repurposing.
- The homepage presents detailed program information, FAQs, named educational partners, a Moscow address, telephone contact details, privacy disclosures, and conventional application forms.
- External reputation checks recorded no malicious or suspicious detections, no threat-list hit, and no reported abuse; the domain also holds an established top-one-million traffic position at rank 407,884.

Regulatory Verification Notes

The homepage refers to licensing context and named institutional partnerships, but the supplied page evidence does not establish a specific licensing authority, licence number, or independently confirmed regulatory status. This is a limited disclosure-verification matter rather than a scam indicator. No conflicting legal-entity names were identified, and no adverse broker-intelligence match was found.

- The homepage provides licensing context alongside higher-education and professional-retraining offerings, but the captured content does not establish a specific licence identifier or issuing authority.

- The homepage states that some programs are delivered with named educational institutions and offers installment-payment arrangements.
- The site is served from AS57724 (DDOS-GUARD – DDOS-GUARD LTD, RU).
- The site’s transport encryption uses a valid YR2-issued domain-validated TLS certificate, valid until 9 September 2026.

What to Verify Next

For qualifications intended for employment, academic progression, or formal professional recognition, the applicable program’s awarding institution, credential type, and recognition status should be confirmed directly with the named institution. Enrollment documentation should also be reviewed for total cost, installment terms, cancellation rights, refund conditions, personal-data processing, and the precise legal party entering the education contract. Where licensing is material to the intended course, the licence details should be confirmed through the relevant official registry.

- The homepage markets both higher-education and professional-retraining programs, making the identity of the credential-awarding institution material to enrollment decisions.
- The application flows collect telephone and email details for consultations, program applications, free-course access, and newsletters, with consent language for personal-data processing and communications.
- The homepage advertises multiple faculties and course formats, so contractual and credential terms may differ by selected program.

Summary Verdict

The website is legitimate, established, and trustworthy, with mutually reinforcing identity, historical, content, behavioral, and reputation signals and no observed contradictions. Its overall posture supports confidence in the authenticity of the service and its ordinary user journeys.

Infrastructure Integrity

The site resolves directly to a single likely origin address in Russia and does not appear to use a CDN or edge-address layer. The identified DDoS-Guard hosting environment and valid encrypted transport provide conventional availability and connection protections; these are mitigating technical controls, not standalone proof of legitimacy.

Closing Assessment

Normal interaction, including account login, consultation requests, enrollment activity, and standard use, is appropriate, with routine contractual due diligence for any paid education commitment.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sredaobuchenia.ru.

- The request stayed on sredaobuchenia.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGTIME-RU. CLEAR
- DNS for this domain is served by net., across 2 name servers. NOTED
- The registration is paid up to 2027-06-03. NOTED
- The earliest public archive of this site is from 2016-12-20. CLEAR
- It is hosted on DDOS-GUARD, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sredaobuchenia.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
