

Is stackpulsepro.com a scam? TrustSniffer's high-risk assessment: 0/100

stackpulsepro.com

Verdict

0

OUT OF 100

CRITICAL RISK

stackpulsepro.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-10-02 by automated analysis. Classification confidence 55%.

What this site appears to be

Marketing site for a CFD broker offering trading on Forex, indices, commodities and cryptocurrencies. Prominent CTAs to create accounts and deposit funds, and multiple named 'investment plans' that list fixed percentage returns. Contains claims of regulation, awards and fund protection but with no verifiable evidence on-page. High structural risk due to guaranteed-return style promises and deposit-before-service flow.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://stackpulsepro.com/>

What stackpulsepro.com served when TrustSniffer captured it on 2026-10-02. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Stack Pulse Pro is a marketing-led online CFD and brokerage platform presenting access to Forex, indices, commodities, shares, ETFs, and cryptocurrencies, with account creation, trading, and deposit functionality intended to solicit customer funds for investment and trading activity.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. Its homepage promotes multiple investment plans with fixed percentage returns, encourages account creation and deposits before service is delivered, and supports login, signup, and deposit forms. It also makes claims concerning regulation, awards, and fund protection without verifiable supporting evidence on the site. The combination of guaranteed-return-style marketing, opaque fund-flow mechanics, unverified crypto payment options, and prominent deposit calls is inconsistent with a low-risk financial-service presentation. External reputation checks identified three malicious detections and a confirmed blacklist status. Three additional abuse reports concern the shared hosting IP rather than being

independently attributed to the site operator, but they remain adverse infrastructure context. No separate identity contradiction or brand impersonation was observed.

EVIDENCE

- Homepage: promotes Forex, CFDs, cryptocurrencies, indices, commodities, and investment plans with specific return promises.
- Homepage: exposes login, signup, and deposit forms, including a sensitive password-enabled interaction surface.
- Homepage: presents claims of regulation, awards, and fund protection without verifiable evidence displayed on the page.
- Domain registration: registered in 2025 and approximately 1.04 years old.

Regulatory Verification Notes

The site's legal and regulatory presentation is insufficient to establish a regulated operator. The website claims regulatory standing and protection-related benefits, but no verifiable regulator, license number, or supporting authorization was identified in the supplied page content. A domain-exact third-party broker record describes the entity as having no regulation and no license found; this is a reputational and verification signal, not a legal determination. The real-world operator identity remains unverified. Transport security confirms encrypted web access, but a Domain Validation certificate authenticates control of the domain rather than regulatory status or ownership.

EVIDENCE

- Legal & Regulation content: regulatory and protection claims are presented without an identifiable license number or independently verifiable authorization.
- Third-party broker record: domain-exact match for Stack Pulse Pro; regulation status recorded as "No Regulation" and license found as "no."
- Transport encryption: TLS certificate issued by YR1, validation level DV, valid to 2026-12-02.

What to Verify Next

Before any sensitive interaction, an independent check should confirm whether the named operator is authorized by the relevant financial regulator for CFD and investment-plan activity, using the regulator's own register rather than site-provided claims. The operator's legal name, registered address, complaints process, client-money arrangements, withdrawal terms, and payment beneficiary should also be reconciled through independently sourced records. Any awards, fund-protection statements, and crypto payment instructions should be validated separately before funds or credentials are considered.

EVIDENCE

- About Us and Legal & Regulation pages: use the stated operator and regulatory claims as the starting point for independent registry checks.
- FAQ, funding, and terms content: reconcile withdrawal, payment, client-money, and complaint provisions against independently sourced operator information.
- Contact page: confirm official support and contact channels through an independent route before relying on them for account or payment matters.

Summary Verdict

The available evidence supports a critical-risk posture for credentials, account access, and financial interaction. The site's commercial presentation, unsupported financial claims, external reputation findings, and unresolved operator verification do not provide a defensible basis for treating it as a trusted brokerage service.

Infrastructure Integrity

The website uses CDN/WAF protection, which can reduce direct exposure of the underlying service and is a mitigating technical control only; it does not establish legitimacy or offset the adverse reputation findings. The observed infrastructure exposed an edge address while the origin server was not observable in this analysis.

EVIDENCE

- Hosting infrastructure: served from AS16276, OVH - OVH SAS, FR.
- CDN/WAF posture: one observed edge IP, 51.89.0.70; no origin candidate was identified.

Closing Assessment

The appropriate posture is to avoid login, credential submission, deposits, and other financial interactions unless independent regulatory, operator, and payment verification produces satisfactory results.

Written analysis generated 2026-10-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

3 findings contributed to this verdict, raised by external reputation, page content, several checks together.

01 External reputation

- Several malware engines flagged this domain.

External reputation rule:EXT_BLACKLIST_HIGH

02 Page content

- The review of the page content rated it high risk.

Page content rule:PAGE_RISK_HIGH

- The page shows few of the signs expected from a trustworthy operator.

Page content rule:PAGE_TRUST_QUALITY_LOW

- The page content shows three or more warning signs that deceptive sites commonly use.

Page content rule:PAGE_RED_FLAGS_STRONG

03 Several checks together

- Several independent checks pointed to risk at the same time.

Several checks together rule:HYB_MULTIPLE_MODULES_HIGH_RISK

Signals weighed against the site

- AbuseIPDB: 3 reports on hosting IP 51.89.0.70 (Server Managed by Hostseo Networks, Data Center/Web Hosting/Transit), 2% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of stackpulsepro.com.

- The request stayed on stackpulsepro.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Internet Domain Service BS Corp.. [CLEAR](#)
- DNS for this domain is served by sterkhost.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-09-17. [NOTED](#)
- It is hosted on OVH, from a server in FR. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about stackpulsepro.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
