

Is staseraintv.com legit? TrustSniffer's high-trust assessment: 100/100

staseraintv.com

Verdict

100

OUT OF 100

HIGH TRUST

staseraintv.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Italian-language TV guide page listing channels and program schedules (e.g., Rai1, Canale5, Italia1), with episode descriptions and links to social profiles. Contact email and cookie/privacy notice present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

StaseraInTV is an Italian-language television listings and entertainment website presenting daily schedules for channels including Rai, Mediaset, La7, Discovery and others, together with programme descriptions, film and sports categories, and links to related social profiles and mobile applications; its apparent model is informational and likely supported by advertising or related distribution activity.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent television-guide function rather than financial solicitations, deceptive investment offers, or requests for sensitive credentials; no login form, hidden form, wallet interaction, cloaking, or brand-impersonation indicator was detected. External reputation checks found no malicious or suspicious indicators, while the site's substantial traffic footprint, sustained historical presence, and links to YouTube, Twitter and Facebook are consistent with an established public-facing service. These signals support a low scam and impersonation concern, although they do not independently prove the real-world operator's identity.

EVIDENCE

- Homepage: lists television channels, programme times, episode descriptions and entertainment categories, with no sensitive form or financial solicitation identified.
- Historical web record: the domain was registered in 2009 and has 2,108 archive snapshots spanning 2009–2026, with 18 years tracked.
- External reputation: evaluated checks recorded zero malicious and zero suspicious detections, with no phishing, impersonation or other contradiction signal.

Regulatory Verification Notes

The website appears to provide general entertainment information rather than a stated regulated service. No licensing claim or registration number is presented in the reviewed content, so regulatory applicability and the responsible operating entity remain matters for ordinary verification rather than indicators of wrongdoing. The available evidence supports an apparently legitimate established site, while operator identity is assessed as likely rather than independently verified. A broker-reputation dataset returned no match, which is contextual reassurance only and not a licensing determination.

EVIDENCE

- Domain registration: Tucows Domains Inc. is the registrar; creation date 2009-01-27 and expiration date 2027-01-27.
- Hosting: served from AS12637 (SEEWEB - SEEWEB s.r.l., Italy).
- Transport security: TLS certificate issued by RapidSSL TLS RSA CA G1, validation level DV, valid to 2026-10-25.
- Homepage: contact and cookie/privacy notices are present, but no licensing claim or registration number is shown.

What to Verify Next

Before any credential or payment interaction arises through an associated application, advertising flow or commercial partner, the operating entity should be matched against the site's legal and contact information through an independent source. Any applicable registration or licensing requirement should be checked with the relevant official registry, and return, cancellation and payment-protection terms should be reviewed independently before a purchase. Official social and contact channels should also be confirmed through an independently sourced route rather than relying solely on on-site links.

EVIDENCE

- Homepage: contact and cookie/privacy notices provide the on-site references against which independently sourced entity details can be compared.
- Site profile: the service is informational, making any separate payment, application-distribution or account flow the relevant point for additional merchant and consumer-protection checks.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk informational website. The overall trust posture is strongly positive and no scam, phishing, impersonation or other contradictory signal was identified, but the conclusion should not be treated as independent proof of the real-world operator's identity.

Infrastructure Integrity

The site resolves to a single likely origin address and does not use a detected CDN or WAF edge layer. This is a direct-hosting configuration rather than an inherently suspicious one; it provides less intermediary protection than an edge-distributed setup but does not contradict the site's positive risk assessment.

Closing Assessment

Normal informational browsing is proportionate; before submitting credentials or making payments through any related flow, independent checks of the operating entity, applicable terms and payment protections should be completed.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of staseraintv.com.

- The request stayed on staseraintv.com. It was not redirected to another domain. CLEAR
- Registration is published under Tucows Domains Inc.. CLEAR
- DNS for this domain is served by technorail.com, across 4 name servers. NOTED
- The registration is paid up to 2027-01-27. NOTED
- The earliest public archive of this site is from 2009-06-08. CLEAR
- It is hosted on SEEWEB, from a server in IT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about staseraintv.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
