Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established Romanian general-news and media portal operating under the PRO TV brand, presenting breaking news, politics, international affairs, economics, health, sports, weather, entertainment, video journalism, and sponsored content through an advertising-supported publishing model.

Scam/Impersonation Risk

No identity, phishing, impersonation, or other contradictory signals were observed. The homepage presents extensive, coherent editorial coverage aligned with the Știrile ProTV identity, while its tested behavior showed no credential-harvesting forms, cloaking, wallet interactions, clipboard manipulation, or suspicious inline scripts. Its long-established domain, strong global traffic footprint, high page authority, and clean standing across the evaluated external threat sources provide convergent evidence of legitimacy.

- The homepage consistently uses Știrile ProTV and PRO TV branding across news categories, live programming, reports, interviews, and video content.
- The domain was registered in 2006 and is approximately 20.02 years old.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no safe-browsing alert, no reported abuse, and a global traffic rank of 7,724.
- Two successful behavioral tests found no login form, hidden form, external password form, wallet provider, wallet-drainer behavior, clipboard hijacking, or cloaking.

Regulatory Verification Notes

The site operates as a news and media publisher rather than as a financial-services, brokerage, deposit-taking, or investment platform; accordingly, no financial licence claim is expected from the observed business model. The homepage provides links for legal, contact, advertising, privacy, cookie, and consent-management information. Advertising, sponsored publishing, audience analytics, personalized advertising, profiling, device identification, and precise-geolocation requests make privacy and commercial-content disclosures the principal compliance considerations, rather than financial regulation.

- The homepage identifies news publishing, video programming, advertising, sponsored articles, and audience analytics as elements of the service.
- The homepage includes legal, contact, advertising, privacy, cookie, and consent-management links.
- Page instrumentation identified one analytics service and one advertising network, together with cookie-consent, personalized-advertising, audience-profiling, device-identification, and precise-geolocation

functions.

- The site’s transport encryption uses a WE1-issued domain-validated TLS certificate, valid until 2026-10-18.

What to Verify Next

Institutional users should confirm that the legal and privacy notices identify the applicable contracting or publishing entity, explain the purposes and legal bases for profiling and geolocation, and provide workable consent-withdrawal controls. Editorial consumers should also confirm that paid or sponsored material is clearly distinguished from independent reporting and that official contact channels correspond with those published through PRO TV’s established corporate materials.

- The homepage exposes dedicated legal, privacy, cookie, consent, advertising, and contact pathways suitable for these checks.
- Sponsored content and advertising are expressly part of the observed publishing model.
- The browser requests permissions or consent associated with personalized advertising, audience profiling, precise geolocation, and device identification.

Summary Verdict

This is a legitimate, established, and trustworthy news website with a mature editorial presence, substantial public reach, and no observed contradictory security or identity indicators. The evidence supports normal interaction, including account login and standard use where such functions are offered.

Infrastructure Integrity

The website is protected by Cloudflare’s mainstream CDN/WAF, with all observed addresses belonging to edge infrastructure and no directly exposed origin identified. This reduces direct origin exposure and provides a useful security mitigation, although infrastructure protection is not itself proof of legitimacy.

- The site was served from AS13335 (Cloudflare, Inc., US).
- Four observed addresses were Cloudflare edge endpoints; no origin-server candidate was exposed during the assessment.

Closing Assessment

Prospective users may interact with the site normally, while applying standard privacy-consent and sponsored-content review practices appropriate to a major advertising-supported news publisher.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

About this assessment

A trust score summarises the evidence TrustSniffer could collect about stirileprotv.ro at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
