- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

STN Video is an established B2B video-publishing platform that provides publishers with premium content, video hosting and playback technology, AI-assisted creation tools, and advertising monetization through commercial partnerships and revenue sharing.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or malicious reputation signals were observed. The homepage presents a coherent corporate service offering supported by named media and sports relationships, testimonials, company resources, contact options, and legal policies. Interactive testing likewise found no hidden forms, credential redirection, cloaking, wallet-related behavior, clipboard interference, or suspicious inline scripts. The long and densely captured web history materially supports continuity rather than opportunistic domain repurposing.

- The homepage was classified as a corporate product homepage and contained no sensitive form, hidden form, or untrusted form destination.
- Behavioral testing completed 2 of 2 runs without cloaking, wallet-drainer activity, clipboard hijacking, fingerprinting, or suspicious inline scripts.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing result, no external threat listing, and 0 infrastructure-abuse reports.
- The domain has 3,998 archive snapshots from 2011-02-08 through 2026-07-19, spanning 16 tracked years; no suspicious repurposing or semantic drift was established.

Regulatory Verification Notes

The website describes a conventional video-technology, content-licensing, and advertising business rather than a regulated financial service, and it makes no financial-license claim requiring validation. Its visible corporate resources, contact options, privacy-related consent controls, and legal policies provide a credible disclosure framework for this business model. Domain registration privacy through Domains By Proxy is an ordinary administrative arrangement and does not undermine the consistent site identity. The established traffic footprint and clean technical reputation further reinforce the site's legitimacy.

- The homepage identifies premium video content, hosting and playback technology, AI creation tools, advertising monetization, commercial partnerships, and publisher revenue sharing as the service model.
- The site exposes corporate resources, contact options, legal policies, and granular cookie-consent controls for functional, preference, statistical, and marketing purposes.

- The WHOIS record shows registration through GoDaddy.com, LLC on 2021-01-26 (~5.52 years old), with expiry on 2027-01-26 and privacy administration by Domains By Proxy, LLC.
- The site has a strong global traffic footprint at rank 13,635; hosting is on AS39962 (PRETECS – FullHost, Canada), and its DV TLS certificate was issued by YR1 and is valid until 2026-10-05.

What to Verify Next

Prospective enterprise customers should complete normal supplier due diligence by confirming the contracting entity, reviewing the applicable service and data-processing terms, validating rights associated with supplied video content, and establishing the advertising-revenue calculation, reporting, payment, and termination provisions. Official commercial and support channels should be confirmed through the contracting process before operational integration.

- The homepage indicates that publishers receive platform setup without charge while revenue is generated and shared through advertising, making commercial-accounting terms a relevant contract-review item.
- The homepage promotes premium third-party content and recognizable media and sports relationships, making content rights, permitted uses, territories, and takedown procedures relevant diligence topics.
- The cookie interface describes personalized advertising and traffic analysis, supporting review of consent allocation, data roles, subprocessors, and retention terms.
- The platform includes hosting and AI-assisted content capabilities, supporting assessment of service availability, output rights, security responsibilities, and incident-notification commitments.

Summary Verdict

The website is legitimate, established, and trustworthy. Its coherent corporate identity, mature operating profile, extensive historical continuity, strong audience presence, clean reputation, and benign observed behavior converge on a high-confidence assessment suitable for normal interaction, including account login and standard platform use.

Infrastructure Integrity

The site resolves directly to a single likely origin address in Canada rather than operating behind an identified CDN or WAF edge. This is a conventional, resolved hosting posture with valid encrypted transport; direct origin visibility is not evidence of illegitimacy, although it provides less network-layer shielding than a dedicated reverse-proxy architecture.

Closing Assessment

Normal use and enterprise engagement are appropriate, subject to routine contractual, privacy, content-rights, and supplier-assurance review proportionate to the intended deployment.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	25%
No on-site identity signals detected	
Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.	
What TrustSniffer observed	
First-party facts recorded during the assessment of stnvideo.com.	
- The request stayed on stnvideo.com. It was not redirected to another domain. CLEAR - Registration is published under GoDaddy.com, LLC. CLEAR - DNS for this domain is served by awsdns-38.org, across 4 name servers. NOTED - The registration is paid up to 2027-01-26. NOTED - The earliest public archive of this site is from 2011-02-08. CLEAR - It is hosted on PRETECS, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about stnvideo.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
