Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

O2O IT Develop is a corporate technology-services website presenting e-commerce development, online-store platforms, mobile applications, API solutions, SaaS, consulting, and related business software services for client organizations.

Scam/Impersonation Risk

No phishing, malware, impersonation, blacklist, or other contradictory signals were observed. The homepage presents a coherent B2B technology-services model, while behavioral testing found no login form, hidden form, wallet interaction, or sensitive-data harvesting mechanism. The domain has a multi-year registration history, continuous archival presence, a clean external reputation, and a global traffic footprint, supporting the conclusion that it is an established legitimate service website.

- Domain registered through RU-CENTER-RU on 2024-04-21; reported age 2.28 years.
- Web archives contain 20 snapshots from 2024-06-19 through 2025-05-25, spanning 2 years.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit.
- Homepage behavior showed no login form, hidden form, wallet activity, or sensitive form.

Regulatory Verification Notes

The supplied site material does not present a license number, regulator reference, or formal registration disclosure. This is a transparency item for commercial due diligence rather than evidence of deception, particularly because the site presents ordinary IT and e-commerce services rather than a regulated financial offering. No contradictory legal identity or broker-reputation match was identified.

- The homepage contains no stated regulatory license or license number.
- Hosting resolves through AS57724, operated by DDOS-GUARD - DDOS-GUARD LTD, RU.
- TLS is issued by YR1 at DV validation level and is valid through 2026-09-19.
- The site's transport encryption and identifiable hosting infrastructure were confirmed during technical inspection.

What to Verify Next

Before a formal supplier relationship, the prospective counterparty should confirm the contracting entity and commercial authority through the applicable corporate registry, review the statement of work and payment terms, and independently confirm official contact channels through a separate business source.

- The homepage describes a service-contract business model centred on software development and consulting.
- The homepage interaction assessment completed 2 successful runs with stable HTTP responses.

- No regulated financial product or financial-services licensing claim was identified in the supplied content.

Summary Verdict

The website presents a legitimate, established, and high-trust posture with no observed scam or impersonation contradictions. Normal interaction, including account login where applicable and standard business use, is appropriate.

Infrastructure Integrity

The site is hosted on AS57724 by DDOS-GUARD - DDOS-GUARD LTD in Russia and resolves to a single likely origin address without a CDN edge identified. This hosting arrangement offers some defensive mitigation, but infrastructure protection is treated only as a supporting control, not as proof of legitimacy.

Closing Assessment

Prospective counterparties may proceed with normal interaction and standard engagement while applying ordinary procurement controls for a B2B technology supplier.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of storefrontapp.ru.

- The request stayed on storefrontapp.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by ru., across 5 name servers. NOTED
- The registration is paid up to 2027-04-21. NOTED
- The earliest public archive of this site is from 2024-06-19. CLEAR
- It is hosted on DDOS-GUARD, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about storefrontapp.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
