- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

StoreHosting is a Brazilian commercial web-hosting provider offering infrastructure and website services through recurring subscription plans, with the apparent purpose of hosting and supporting customer websites.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other contradictory signals were observed. The homepage's warning about boleto issuances by an unrelated similarly named company is a protective anti-fraud disclosure, not evidence that StoreHosting is impersonating another entity. The site's established operating history and clean external reputation support a legitimate identity assessment.

- The homepage explicitly distinguishes StoreHosting from the unrelated "STOREHOST BRASIL" entity and identifies its own corporate identity.
- The domain was registered 2013-02-22 and is approximately 13.45 years old.
- The domain has 248 archive snapshots spanning 2013–2025, covering 13 tracked years.
- External reputation checks recorded zero malicious and zero suspicious detections.

Regulatory Verification Notes

The homepage presents a clear commercial model involving WordPress hosting, reseller hosting, VPS and dedicated servers, migration, SSL, backups, and continuous support. It identifies the operating company as Storehosting Soluções Web Ltda, with CNPJ 19.178.460/0001-32. No sector-specific license is claimed, which is a transparency point for commercial due diligence rather than evidence of misconduct. The available third-party broker context contains no match.

- The homepage provides detailed hosting services, recurring pricing, support terms, and service features.
- The homepage identifies "STOREHOSTING SOLUÇÕES WEB LTDA" and CNPJ 19.178.460/0001-32.
- The website is hosted on AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- TLS uses issuer WE1 with DV validation and is valid through 2026-10-18.

What to Verify Next

For a formal commercial relationship, confirm the company identity and any applicable Brazilian business or consumer-service requirements through the relevant official registry. Confirm contractual terms, billing instructions, and support channels through the website's Contact and Client Area paths before establishing recurring service.

- The homepage provides visible Contact and Client Area navigation.
- The homepage publishes service descriptions, pricing, support availability, backup terms, and SSL-related features.

Summary Verdict

StoreHosting presents a legitimate, established, and trustworthy posture with strong convergence across identity, operating history, page substance, technical stability, and external reputation. Normal interaction, including account login and standard service use, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, which reduces direct exposure of the underlying hosting environment and is a meaningful defensive control. This protection mitigates infrastructure risk but does not independently establish legitimacy.

- Served from AS13335 (Cloudflare).
- Four observed IP addresses were Cloudflare edge addresses; no origin candidate was identified.
- TLS certificate issuer: WE1; validation level: DV; expiry: 2026-10-18T14:34:48+00:00.

Closing Assessment

Normal account access and standard service transactions are appropriate, with routine contractual and payment diligence suitable for any hosting supplier.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about storehosting.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
