Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Storepass is a SaaS platform for trading-card and hobby retailers, presenting buylist management, point of sale, product catalog, search, price automation, integrations, and subscription plans for managing retail operations.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed blacklist findings were observed. The homepage presents a coherent software business model, while the site behavior shows no hidden forms, wallet activity, suspicious scripts, or untrusted destinations. Its external reputation checks were clean, and its traffic footprint is established enough to support the conclusion that this is a genuine operating website.

EVIDENCE

- The homepage identifies Storepass as TCG and hobby-store software and describes buylist, POS, catalog, search, and pricing functions.
- The homepage contains no sensitive submission form or apparent credential-harvesting mechanism.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist match.

Regulatory Verification Notes

Storepass operates as commercial retail software rather than presenting itself as a financial service. The site describes recurring subscriptions, trials, demos, integrations, support tiers, and plans ranging from \$99 to \$4,999 per month, with transaction fees on some plans. No specific regulatory license or registration number is claimed; this is a limited disclosure point for ordinary corporate and contractual verification, not evidence of deception. The published registrant organization is "Registrant of storepass.co," administered through WHOIS privacy services.

EVIDENCE

- The homepage and pricing content describe tiered SaaS subscriptions, trials, demos, integrations, and support.
- The domain was registered on 2022-08-31 and is approximately 3.92 years old; registrar: 1API GmbH.
- Hosted on AS16509 (Amazon Technologies Inc.); TLS certificate issued by YR2 with DV validation, valid to 2026-10-13.

What to Verify Next

For procurement or material commercial engagement, confirm the contracting entity, applicable terms, refund arrangements, data-processing commitments, and support channels through the site’s documentation and booking process. Where organizational registration or sector-specific obligations matter, validate them independently against the relevant corporate registry.

EVIDENCE

- The homepage provides links to documentation, pricing, demos, sign-up, and login workflows.
- The product pages describe integrations and retailer-operational functions that can be mapped to procurement and data-governance requirements.
- The site presents support tiers and customer-use claims for follow-up commercial validation.

Summary Verdict

Storepass presents as a legitimate, established, high-trust business website with a consistent SaaS identity and no observed scam or impersonation contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is hosted on Amazon infrastructure and uses valid domain-validated TLS issued by YR2. This provides a standard protective baseline and reduces exposure of the underlying service, but infrastructure protection is treated as a mitigating control rather than proof of legitimacy.

Closing Assessment

Storepass is suitable for normal evaluation and use, with standard commercial and contractual due diligence appropriate before a significant business commitment.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of storepass.co.

- The request stayed on storepass.co. It was not redirected to another domain.

CLEAR

- Registration is published under 1API GmbH. CLEAR
- DNS for this domain is served by dnsimple-edge.net, across 4 name servers. NOTED
- The registration is paid up to 2026-08-31. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about storepass.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
