

Is streamshop.com.br legit? TrustSniffer's high-trust assessment: 100/100

streamshop.com.br

Verdict

100

OUT OF 100

HIGH TRUST

streamshop.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 70%.

What this site appears to be

Marketing and product site for StreamShop, a video commerce SaaS offering interactive video players, live commerce, AI video generation, and retail media monetization. Includes product descriptions, testimonials, plans, API/SDK docs, and demo/contact forms.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

StreamShop is a corporate SaaS platform for e-commerce video commerce, presenting interactive video, live commerce, generative VideoAI, retail-media monetization, video customer support, API/SDK capabilities, subscription plans, and demo-driven enterprise services.

Scam/Impersonation Risk

No contradictory phishing, impersonation, malicious-content, or conflicting-identity signals were observed. The site presents a coherent StreamShop business model with product descriptions, customer testimonials, plans, documentation, contact and demo forms, and links to multiple established social platforms. External reputation checks were clean, while two abuse reports associated with shared content-delivery infrastructure were discounted because they applied to the provider's shared IP rather than specifically to StreamShop. The available evidence is therefore consistent with an established, apparently legitimate website, although the real-world operator identity is not independently verified.

EVIDENCE

- Domain registration telemetry: registered 2020-04-18 (~6.32 years old), with expiry recorded as 2029-04-18.
- Archive telemetry: 63 snapshots spanning 2021-02-24 to 2026-07-05, covering 6 years with no suspicious repurposing or semantic drift detected.
- Homepage analysis: no brand-impersonation, phishing, crypto, wallet, hidden-form, or other red-flag indicators detected; two abuse reports concerned shared provider infrastructure.

Regulatory Verification Notes

StreamShop's About, Contact, Privacy, Terms and Conditions, Plans, and API/SDK areas provide the structure expected of a commercial software provider. The site does not present a financial-services licensing claim or registration number, which is a regulatory-disclosure point to clarify rather than evidence of a scam. Technical registration data associates the domain with Stream Shop Brasil Tecnologia Ltda., but that association does not independently prove the operating entity. The business model appears to be subscription and enterprise SaaS, with revenue from software licensing, custom deployments, and media monetization; any customer engagement should therefore be assessed under ordinary commercial contracting and payment-protection expectations.

EVIDENCE

- Hosting telemetry: served from AS209242, CLOUDFLARESPECTRUM - Cloudflare London, LLC, US.
- Transport telemetry: TLS certificate issued by WE1, validation level DV, valid to 2026-10-31T03:35:31+00:00.
- Homepage and product pages: identify Video Commerce, Live Commerce, VideoAI, Retail Media, Video Atendimento, API & SDK, plans, testimonials, and demo/contact pathways.
- Legal and contact pages: Privacy Policies, Terms and Conditions, About, and Contact sections are present; no license number or financial-regulatory authorization is stated in the supplied content.

What to Verify Next

Before credential or payment interactions, an enterprise customer should confirm the contracting legal entity and obtain the applicable agreement, pricing, service commitments, data-processing terms, and refund or termination provisions. If the proposed service involves regulated advertising, consumer data, payment processing, or sector-specific deployments, the relevant contractual and regulatory responsibilities should be confirmed with the counterparty and, where applicable, the appropriate registry. Contact details and commercial documents should also be validated through an independent corporate channel rather than relying solely on a web form.

EVIDENCE

- Plans and demo forms: the commercial journey is based on subscription or enterprise engagement rather than an immediate self-service financial transaction.
- API and documentation pages: technical integration materials are available for review before deployment.
- Privacy and Terms pages: contractual, data-use, and service conditions should be checked against any proposed order or implementation statement.
- Social and contact links: multiple external corporate-presence channels are available for independent channel validation.

Summary Verdict

The site has a **high-trust, low-risk posture** and is evidence-consistent with an established commercial SaaS operation. Its coherent business presentation, sustained domain and web presence, clean reputation signals, and normal technical controls support ordinary business consideration, while the operator's real-world identity remains only likely rather than independently verified.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and the observed address is a CDN edge endpoint rather than a directly exposed origin. This reduces routine exposure of the underlying hosting environment and is a mitigating infrastructure signal, not proof of corporate legitimacy.

Closing Assessment

Normal evaluation may proceed, provided ordinary independent checks of the counterparty, commercial terms, and payment protections are completed before credentials or payments are submitted.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 2 reports on hosting IP 2620:cb:2000::1 (Webflow, Inc, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of streamshop.com.br.

- The request stayed on streamshop.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by co.uk, across 4 name servers. NOTED
- The registration is paid up to 2029-04-18. CLEAR
- The earliest public archive of this site is from 2021-02-24. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about streamshop.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
