

Is stripchat.com legit? TrustSniffer's high-trust assessment: 90/100

stripchat.com

Verdict

90

OUT OF 100

HIGH TRUST

stripchat.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 45%.

What this site appears to be

Stripchat homepage offering live adult webcam broadcasts from individual performers and couples, with free viewing, accounts, real-time chat, token tipping, private sessions, ticketed shows, age verification, and performer recruitment.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Stripchat is an established adult live-streaming marketplace that connects viewers with individual performers and couples, offering free broadcasts, interactive chat, paid private sessions, ticketed shows, and virtual-token tipping alongside performer and studio participation programs.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or confirmed malicious reputation signals were observed. The domain's long operating history, substantial global traffic footprint, stable interactive behavior, and clean security-source coverage strongly support the conclusion that the website represents the established Stripchat service rather than a deceptive copy. The homepage contained no hidden or externally submitted credential forms, and observed network submissions remained within recognized destinations.

- The domain registration record shows registration in 2006 (~20.47 years old) through Amazon Registrar, Inc., with expiration in 2029.
- The homepage consistently identifies the service as Stripchat and presents a developed adult live-cam directory with account access, performer categories, and service-specific navigation.
- Technical interaction testing completed 2 of 2 runs successfully, with no cloaking, hidden forms, clipboard hijacking, wallet-provider activity, or external password forms detected.
- External reputation assessment recorded 0 malicious and 0 suspicious classifications, no unsafe-browsing detection, and a global traffic rank of 761.

Regulatory Verification Notes

The homepage provides links to a privacy policy, terms of use, billing support, content-reporting facilities, and an 18 U.S.C. § 2257 record-keeping statement. It also presents an age-verification gate described as required by state law. These are substantive compliance and user-protection disclosures for an adult-content platform. The supplied pages do not establish a separately verified regulatory or licensing status; however, no specific financial or professional-services licence would ordinarily be inferred solely from the marketplace model described. The platform's payment mechanics—virtual-token tipping, private sessions, and ticketed shows—create consumer-billing, refund, performer-governance, and age-assurance considerations rather than evidence of fraud.

- The homepage footer links to the Privacy Policy, Terms of Use, Billing Support, Report Content, and the 18 U.S.C. § 2257 Record-Keeping Statement.

- The homepage displays an 18+ verification gate and states that age verification may be required by state law.
- The homepage provides dedicated “Become a Model” and “Studio Signup” routes, evidencing a structured two-sided marketplace.
- The site is served from AS13335 (Cloudflare); its DV TLS certificate was issued by WE1 and is valid until 2026-10-28.

What to Verify Next

Prospective account holders should review the applicable terms for token pricing, recurring charges, refunds, private-show recording, and dispute handling before purchasing services. Users subject to jurisdiction-specific age-assurance or adult-content rules should confirm which verification process applies and how identity data is handled. Performers and studios should separately examine onboarding, content-removal, payout, consent, and record-keeping obligations. Official billing or media channels should be confirmed through the corresponding site navigation before discussing account-specific matters.

- The homepage distinguishes free viewing from paid interaction and displays token-denominated private-show pricing.
- “Recordable Privates,” “Spy on Shows,” and “Video Call (Cam2Cam)” appear as distinct homepage service features with different privacy implications.
- Separate Billing Support, Support & FAQ, Report Content, and Media Inquiries routes are presented on the homepage.
- A cookie-consent prompt and QR-code application promotion were observed alongside the age-assurance interface.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence among domain provenance, public usage, coherent service content, stable behavior, and clean threat-reputation findings. No contradictory evidence undermines the presented identity. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The website uses Cloudflare’s CDN and WAF, with observed edge addresses 104.17.117.12 and 104.17.118.12. The origin server was not exposed during the assessment, which is consistent with the protective architecture and reduces direct infrastructure exposure, although this control is a security mitigation rather than independent proof of legitimacy.

Closing Assessment

The service is suitable for normal use, subject to ordinary adult-content, privacy, and payment safeguards appropriate to the user’s jurisdiction and intended activity.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of stripchat.com.

- The request stayed on stripchat.com. It was not redirected to another domain. CLEAR
- Registration is published under Amazon Registrar, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2029-02-13. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about stripchat.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
