

Is stuttgarter-nachrichten.de legit? TrustSniffer's high-trust assessment: 100/100

stuttgarter-nachrichten.de

Verdict

100

OUT OF 100

HIGH TRUST

stuttgarter-nachrichten.de appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-12 by automated analysis. Classification confidence 75%.

What this site appears to be

Homepage of a regional German newspaper (Stuttgarter Nachrichten) featuring local and national news, sports, and subscription prompts. Primary monetization via subscriptions and ads; editorial content and navigation visible.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1998.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the homepage of a regional German newspaper presenting local and national news, sports, culture, services, and subscription options. Its apparent business model is editorial publishing supported by paid subscriptions, advertising, classifieds, promoted content, and user accounts for personalization and subscription management.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence. The homepage presents a coherent regional-news publishing model, with visible editorial sections, subscription prompts, legal navigation, and no detected brand-impersonation, phishing, malware, wallet-drainer, or hidden-sensitive-form indicators. Automated interaction generated external requests and page changes, but the observed behavior did not include cloaking, clipboard manipulation, password submission to external forms, or other high-risk abuse patterns. The overall evidence is therefore consistent with an established, apparently legitimate site, while the real-world operator identity remains independently unverified. No relevant contact-channel integrity anomaly was identified in the supplied findings.

EVIDENCE

- Domain registration continuity: registered 1997 (~28.1 years old).
- Web-archive history: 5,000 snapshots spanning 1998–2021, with 24 years tracked.
- Homepage analysis: no red flags, suspected brand impersonation, or phishing indicators beyond the site's ordinary login/subscription function.
- Interaction telemetry: 2 successful runs; 0 wallet-connect runs, 0 wallet-sensitive runs, 0 wallet-drainer runs, 0 clipboard-hijack runs, and 0 external password forms.

Regulatory Verification Notes

The site exposes dedicated "Impressum," "Datenschutz," "AGBs," "Rechtliches," and support navigation, which is appropriate for a consumer-facing publisher. The available material does not establish an independently verified real-world operator identity, and no regulatory license or license number is presented; for a regional newspaper, this is a disclosure and verification point rather than evidence of a scam. The site's subscription model makes the publisher's legal identity, subscription terms, cancellation provisions, and payment arrangements the relevant matters for routine due diligence. External reputation coverage was clean, and no relevant broker association was identified.

EVIDENCE

- Homepage navigation: “Impressum,” “Datenschutz,” “AGBs,” “Rechtliches,” “Support,” and subscription-management links are present.
- Hosting telemetry: served from AS16509 (Amazon.com, Inc., US).
- TLS certificate: issued by Amazon RSA 2048 M01, validation level DV, valid to 2026-12-03T23:59:59+00:00.
- External reputation checks: 0 malicious detections, 0 suspicious detections, and 0 abuse reports were recorded.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the legal publisher named in the Impressum, review the subscription and cancellation terms, and ensure that any payment flow provides appropriate consumer protections. Contact channels should be confirmed through an independently sourced route rather than relying solely on information encountered during a suspicious redirect or unsolicited message. Account users should also apply normal password-reuse and multifactor-authentication controls.

EVIDENCE

- Impressum and legal-information pages: suitable locations for confirming the named publisher and responsible entity.
- AGBs and subscription pages: suitable locations for checking fees, renewal, cancellation, and refund conditions.
- Subscription workflow: the homepage offers both login/account access and paid digital-subscription options.
- Support navigation: provides a site-level route for confirming service and account-management procedures.

Summary Verdict

The overall posture is **high trust and low risk**, with strong evidence of an established, professionally operated news website and no observed scam or impersonation contradictions. Legitimacy is apparent and evidence-consistent rather than proven through independent operator verification.

Infrastructure Integrity

The site’s technical evidence identifies Amazon infrastructure for transport, while infrastructure resolution separately identifies BOREUS – WIIT AG in Germany. No CDN or WAF was detected, and one likely origin address was resolved; this provides less edge-layer shielding than a CDN-fronted deployment but does not contradict the favorable technical and reputation assessment.

Closing Assessment

Normal browsing is proportionate, while account or payment use should follow the ordinary independent identity, terms, and payment-protection checks expected for any subscription service whose operator has not been independently verified.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of stuttgarter-nachrichten.de.

- The request stayed on stuttgarter-nachrichten.de. It was not redirected to another domain. CLEAR
- DNS for this domain is served by ns14.net, across 4 name servers. NOTED
- The earliest public archive of this site is from 1998-07-05. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about stuttgarter-nachrichten.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were

consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
