Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

SuperAwesome is a corporate B2B marketing-technology website focused on youth-oriented advertising, creator, gaming, video, audio, and intelligence solutions for advertisers, developers, publishers, creators, parents, and policy stakeholders. Its apparent business model is to provide marketing technology, advertising products, consulting, and related services supported by case studies, research, company information, and business contact channels.

Scam/Impersonation Risk

No contradictions were observed. The site presents consistent SuperAwesome branding and a coherent corporate purpose across its marketing content, resources, company information, and contact areas. There are no observed phishing, impersonation, malicious-content, or confirmed blacklist indicators, and the site's established public footprint and sustained historical continuity support the conclusion that it is the genuine corporate website rather than a recently created imitation.

EVIDENCE

- The homepage identifies the site as "Youth Marketing Solutions | SuperAwesome" and presents consistent advertiser, developer, publisher, creator, and policy-maker audiences.
- The site's content includes company information, press coverage, careers, case studies, reports, and a Kidtech podcast, with no observed impersonation or phishing indicators.
- External reputation checks recorded zero malicious detections, zero suspicious detections, and no blacklist hit.
- Domain registration: created 2002-09-13; age 23.92 years.

Regulatory Verification Notes

The website operates as a corporate marketing and technology provider rather than presenting itself as a financial-services venue. Its pages describe youth-focused advertising, data, creator, and platform services, but the supplied content does not present a financial-services license or registration number. That is a limited disclosure point for any engagement requiring regulated activity, not evidence of deception. The available third-party broker context produced no matching result, while the site's identity, technical continuity, and external reputation remain consistent with an established commercial entity.

EVIDENCE

- The homepage and company materials describe B2B marketing technology and services for brands, advertisers, publishers, and creators; no license number is displayed in the supplied site content.
- Domain registration record: Amazon Registrar, Inc.; creation date 2002-09-13T15:56:31Z.
- Archive history: 595 snapshots spanning 2002–2026, covering 25 years, with a maximum observed gap of 3 years.
- The site's transport encryption uses a DV TLS certificate issued by WE1, valid to 2026-09-14T06:00:04+00:00.

What to Verify Next

For a procurement or partnership decision, the contracting entity, applicable privacy and data-processing terms, and commercial authority should be matched to the specific agreement being considered. If the proposed relationship involves a regulated activity or jurisdiction-specific authorization, the relevant official registry should be checked against the legal entity named in the contract. Standard corporate contact channels should also be confirmed through an independent business record or an established offline relationship before material contractual commitments.

EVIDENCE

- The About Us, Company, Careers, and Contact Us areas provide the principal locations for confirming the site's corporate identity and business relationship details.
- The site provides case studies, reports, privacy-related resources, and contact or newsletter forms that can be reviewed against the intended commercial use.
- The supplied content identifies a B2B corporate model and does not claim a financial-services license.

Summary Verdict

SuperAwesome presents as a legitimate, established, and trustworthy corporate website with a high-confidence identity and low observed abuse risk. The evidence supports normal interaction, including account login where offered and standard business use, without a need for a read-only posture.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with observed traffic served through Cloudflare edge addresses and no origin candidate identified in the supplied infrastructure assessment. This is a mitigating defensive measure that reduces direct exposure of the underlying service, but it is not, by itself, proof of legitimacy.

Closing Assessment

Standard engagement is appropriate, with ordinary enterprise controls applied to contractual, privacy, and data-processing decisions proportionate to the intended business relationship.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of superawesome.com.

- The request stayed on superawesome.com. It was not redirected to another domain. CLEAR
- Registration is published under Amazon Registrar, Inc.. CLEAR
- DNS for this domain is served by awsdns-14.org, across 4 name servers. NOTED
- The registration is paid up to 2027-09-13. NOTED
- The earliest public archive of this site is from 2002-09-03. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about superawesome.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent

with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
