

Is superguidatv.it legit? TrustSniffer's high-trust assessment: 90/100

superguidatv.it

Verdict

90

OUT OF 100

HIGH TRUST

superguidatv.it appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Italian TV guide and entertainment news page with schedules, program highlights, gossip, streaming platform references, and editorial articles. Contact and company information appears in the footer; primary monetization appears to be display advertising.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is an Italian TV guide and entertainment publication presenting television schedules, channel listings, programme previews, audience figures, soap-opera and reality-show coverage, celebrity news, streaming-platform references, and horoscope content. Its apparent business model is an established informational media service monetized primarily through advertising and related sponsored or affiliate activity.

Scam/Impersonation Risk

No contradictions were observed: there is no indication of phishing, impersonation, malicious reputation, or conflicting identity presentation. The homepage is consistent with a conventional editorial media operation, with no login form, sensitive-data form, wallet connection, or untrusted form destination. Behavioural telemetry recorded DOM changes and several inline scripts, but the available interpretation does not establish a malicious function; these signals are compatible with advertising, analytics, and dynamic page presentation. The site's long registration continuity and clean external reputation further support an apparently established, low-risk profile, while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage presents TV schedules, programme categories, entertainment coverage, streaming references, and editorial articles; page analysis recorded no red flags.
- Domain registration: 2011-01-13; age 15.59 years.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, 0 abuse reports, and no blacklist hit.
- The homepage contains no login form, hidden sensitive form, wallet activity, password submission to an external form, or detected brand-impersonation indicator.

Regulatory Verification Notes

The site appears to operate as an informational television and entertainment publisher rather than a financial or otherwise regulated service. Its footer contains contact and company information, but the supplied page content does not show a regulated-service license claim or license number; this is a disclosure point for ordinary publisher-identity verification, not evidence of a scam. A reputable registrar, a long-established registration record, a strong global traffic footprint, clean reputation results, and valid transport encryption are convergent signals supporting the site's apparent establishment. The available evidence remains insufficient to independently verify the operator's real-world legal identity.

EVIDENCE

- The homepage footer contains contact and company information, while the site's stated activity is editorial TV programming and entertainment coverage.
- The domain is registered through PERSOLVO d.o.o.; the recorded organization is IdeaSolutions srl.
- The site is served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- TLS uses issuer WE1 with DV validation and is valid to 2026-10-01T18:34:11+00:00.

What to Verify Next

Before any credential or payment interaction that may arise through advertising, subscriptions, or linked services, independently confirm the publisher's legal identity using the contact and legal details in the footer, review the applicable privacy, advertising, and terms disclosures, and ensure that any transaction is handled by the intended merchant rather than an unrelated advertising destination. Official contact channels should be confirmed through an independent route where the interaction involves account access, payment, or a material commitment.

EVIDENCE

- The homepage identifies an advertising-supported editorial model rather than a direct financial-service transaction flow.
- The page contains no sensitive form or login workflow requiring immediate credential submission.
- The footer provides the site's available contact and company information for independent comparison.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a low overall risk posture and no observed scam or impersonation contradiction. The classification is strong at the website level, although the real-world operator identity remains independently unverified.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge addresses rather than identified origin servers. This provides a meaningful mitigation against direct origin exposure and common infrastructure abuse, but it is a protective hosting characteristic rather than proof of legitimacy.

EVIDENCE

- Cloudflare was detected as the CDN/WAF provider; observed edge addresses were 104.20.39.128, 172.66.153.50, 2606:4700:10::6814:2780, and 2606:4700:10::ac42:9932.
- All observed edge addresses resolve through AS13335; no likely origin candidate was identified.

Closing Assessment

Ordinary browsing and editorial use are proportionate to the available evidence. For any future credential or payment interaction, routine independent checks of the merchant, transaction destination, return terms, and payment protections should be completed first.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about superguidatv.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
