

Is superhosting.bg legit? TrustSniffer's high-trust assessment: 90/100

superhosting.bg

Verdict

90

OUT OF 100

HIGH TRUST

superhosting.bg appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 75%.

What this site appears to be

Official commercial site for SuperHosting.BG offering hosting, domain registration, WordPress services, GDPR tools and managed infrastructure. Provides pricing, contact channels, support and membership of team.blue.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

The page as captured

https://www.superhosting.bg/

What superhosting.bg served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2005.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

SuperHosting.BG is a commercial web-hosting and domain-registration website presenting hosting plans, WordPress services with an AI assistant, GDPR tools, managed VPS infrastructure, site-building and online-store services, supported by subscription and one-time service sales and presented as part of the team.blue group.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malware, or other contradictory signals were observed. The homepage presents a coherent corporate-service model, with no login form, sensitive submission form, hidden form, wallet connection, or untrusted form destination identified. Reputation checks were clean, and the site has a top-tier global traffic footprint. One abuse report concerns the shared hosting IP used by SuperHosting.BG Ltd., rather than the website as an identified subject; this attribution limits its significance for site-level risk. The long-established domain and continuous historical presence are consistent with an established service rather than a recently created impersonation.

EVIDENCE

- The homepage was classified as a corporate/service landing page with no red flags, no login form, no sensitive form, and no phishing indicators.
- Domain registration continuity is 20.73 years.
- The web archive contains 1,996 snapshots spanning 2005-11-24 through 2026-07-19, covering 22 years with a maximum observed gap of 1 year.
- The shared hosting IP 91.196.124.146 has 1 abuse report, attributed to shared infrastructure operated by SuperHosting.BG Ltd.

Regulatory Verification Notes

The website's apparent business is ordinary commercial hosting and domain services rather than a financial activity requiring the type of broker or investment authorization addressed by financial regulators. No regulatory license or license number is claimed in the reviewed material, so the site's regulatory status should not be inferred from the trust assessment. The on-site presentation includes pricing, support and contact pathways, while the stated team.blue relationship remains an on-site affiliation claim rather than independently verified proof of the operator's legal identity. No matching third-party broker-reputation record was identified.

EVIDENCE

- The homepage provides commercial pricing and links to contact and support services.
- The site's TLS certificate is issued by GeoTrust TLS RSA CA G1 at OV validation level and is valid to 2026-12-18.
- The reviewed third-party broker-reputation dataset returned no match for the site.

What to Verify Next

Before credential or payment interactions, independently confirm the contracting merchant or service entity through corporate information obtained outside the website. Review the applicable service, renewal, cancellation and refund terms, and confirm that the selected payment method provides appropriate transaction protection. Contact channels should also be validated through an independently sourced route before resolving account or billing disputes.

EVIDENCE

- The homepage links to dedicated support and contact pathways.
- The site provides service pricing and subscription-oriented offerings, making renewal and cancellation terms relevant to a prospective transaction.
- The homepage links to PayPal and Apple Pay, providing identifiable payment-method references for payment-protection review.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The real-world operator identity remains likely rather than independently verified, so the trust conclusion should not be treated as proof of legal-entity identity.

Infrastructure Integrity

The site is directly hosted without a detected CDN or WAF layer and resolves to a single likely origin. This provides less edge-layer shielding than a CDN-backed deployment, but the hosting arrangement itself is not evidence of malicious activity.

EVIDENCE

- Hosted on AS201200, SUPERHOSTING_AS — SuperHosting.BG Ltd., BG.
- The resolved server IP is 91.196.124.146 in Bulgaria, with 1 unique IP and 1 likely origin IP observed.
- No CDN or WAF vendor was detected.

Closing Assessment

Ordinary browsing and standard service use are proportionate to the current assessment; independent merchant-identity, service-term and payment-protection checks should be completed before credentials or payment details are submitted.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 91.196.124.146 (SuperHosting.BG Ltd., Data Center/Web Hosting/Transit), 1% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of superhosting.bg.

- The request stayed on superhosting.bg. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2005-11-24. CLEAR
- It is hosted on SUPERHOSTING_AS, from a server in BG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about superhosting.bg at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
