Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a partner-funded sustainability education and professional-learning platform providing free assessments, CPD-accredited training, events, resources, and industry collaboration opportunities for organisations and practitioners across the built-environment supply chain.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behaviour, malicious reputation findings, or other fraud signals were observed. The site presents a coherent institutional identity supported by a long-established domain, substantial historical continuity, an established traffic footprint, extensive first-party content, and consistent links to governance, membership, learning, and policy functions. Tested homepage forms were limited to search functions, with no sensitive submission or untrusted destination identified.

- The homepage consistently identifies the Supply Chain Sustainability School and provides structured navigation to its board, school structure, team, membership, learning, partner, contact, and policy pages.
- The domain was registered through 123-Reg Limited on 7 March 2012 and is approximately 14.41 years old; registration is current to 7 March 2027.
- The web archive contains 301 snapshots spanning 27 May 2012 to 23 June 2026, representing 15 years of tracked history with no detected suspicious repurposing.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no search-safety finding, no abuse reports, and a traffic rank of 528,039.

Regulatory Verification Notes

The site describes a free, corporate-partner-funded educational model rather than a regulated financial or investment service. No licensing claim is made, and the available homepage evidence does not establish that a sector-specific regulatory authorisation is required. Its visible pathways to board, delivery-partner, team, terms, privacy, accessibility, and reporting content indicate a developed governance and policy framework, although the underlying legal-page text was not included in the assessed page content and therefore cannot be characterised further.

- The homepage states that corporate partners fund the platform and help shape its strategy, training, and governance while membership remains free.
- The homepage offers dedicated links to "The Board," "School Structure," "Delivery Partner," "Meet the Team," "Reports," "Terms and Conditions," and "Privacy Policy."

- The hosting connection is served from AS13335 (Cloudflare, Inc., US).
- The site’s transport encryption uses a WE1-issued domain-validated TLS certificate, valid until 4 October 2026.

What to Verify Next

For institutional onboarding or formal supplier due diligence, the contracting entity and applicable terms should be confirmed from the site’s legal documentation, while material partnership, accreditation, or membership assertions should be checked against the relevant named organisation. Official contact channels should be confirmed through an independent corporate source where communications will involve contractual commitments or personal data.

- The homepage provides direct routes to terms, privacy, accessibility, contact, and partner information suitable for formal due-diligence review.
- The learning proposition includes CPD-accredited training, making the stated accreditation relevant where professional-development credit will be relied upon.
- The site links to member case studies, a member directory, international schools, and corporate partnerships, providing defined claims that can be corroborated during organisational onboarding.

Summary Verdict

The website is a legitimate, established, and trustworthy educational platform. Its identity, historical continuity, professional content, governance structure, and clean security reputation converge without material contradiction, supporting a high-confidence trust posture.

Infrastructure Integrity

Cloudflare provides the site’s CDN and WAF layer, and all four observed addresses were Cloudflare edge nodes rather than exposed origin infrastructure. This reduces direct server exposure and provides a meaningful defensive control, while remaining a technical mitigation rather than independent proof of organisational legitimacy.

Closing Assessment

Normal interaction, including account registration, login, use of learning resources, and standard account activity, is appropriate.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of supplychainschool.co.uk.

- The request stayed on supplychainschool.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under 123-Reg Limited t/a 123-reg [Tag = 123-REG]. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-07. NOTED
- The earliest public archive of this site is from 2012-05-27. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about supplychainschool.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
