

Is surun.info a scam? TrustSniffer's high-risk assessment: 0/100

surun.info

Verdict

0

OUT OF 100

CRITICAL RISK

surun.info shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 75%.

What this site appears to be

GPT summary ready (confidence 0.5)

Compromised host notice

A threat-intelligence feed listed a file on surun.info as distributing malware (last seen 2026-09-22). TrustSniffer's evidence indicates that the site itself was compromised: the listing concerns a file placed on it by someone else, and the site's owner is most likely a victim, not the actor.

Until the file is removed, downloading anything from this site is not safe. If you run this site, remove the listed file, update the site software and its plugins, change its passwords and review it for other unauthorized changes.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Domain age	8.2 years old Registered history	CLEAR

Web archive	Archived since 2013 245 snapshots	CLEAR
Certificate	Encrypted connection Issued by YR1	NOTED

The page as captured

https://surun.info/

What surun.info served when TrustSniffer captured it on 2026-09-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website at surun.info currently presents no visible page text, metadata, links, forms, or identifiable business content to a visitor, so its purpose and operating model cannot be established from the live page; the available presentation is effectively blank rather than a transparent service or corporate website.

Scam/Impersonation Risk

The site has a critical security posture because external threat intelligence recorded confirmed blacklist coverage and multiple malicious detections, including 12 malicious and three suspicious assessments. The blank page prevents validation of the operator, purpose, or any legitimate business context, while the threat

detections materially outweigh the domain's otherwise established historical presence. No confirmed impersonation or phishing form was observed in the supplied page evidence, but the confirmed blacklist status is sufficient to treat login, credential, and financial interaction as unsafe.

EVIDENCE

- External reputation assessment recorded 12 malicious detections, three suspicious detections, and confirmed blacklist status; two tier-one security providers also flagged the site.
- The homepage returned HTTP 200 but contained no visible text, title, metadata, links, or forms, leaving no site-level basis for validating its purpose.
- The domain was registered on 2018-07-06 and is recorded as approximately 8.22 years old.
- Historical records contain 245 snapshots spanning 2013–2025, with 13 years tracked; this continuity does not neutralize the current malicious detections.

Regulatory Verification Notes

The site does not provide visible legal, corporate, licensing, or regulatory information because the captured homepage contains no substantive content. The real-world operator therefore remains unverified, and no licensing claim or registration number can be assessed from the site. This is a disclosure gap rather than independent proof of fraud, but it compounds the inability to establish accountability alongside the external threat findings. Transport security and ordinary hosting arrangements are present, yet they do not establish operator legitimacy.

EVIDENCE

- The site's transport certificate is DV-validated, issued by YR1, and valid to 2026-12-02.
- The site is hosted on AS14061, DIGITALOCEAN-ASN – DigitalOcean, LLC, US.
- The homepage contains no observable legal name, registered address, license authority, license number, terms, or regulatory disclosure.

What to Verify Next

Before any interaction beyond passive observation, an independent source should confirm the legal operator and the site's official purpose. Any claimed financial, commercial, or regulated service should be checked directly against the relevant official registry, using independently sourced contact details rather than details obtained from the site. Security teams should also confirm whether the domain remains listed by the relevant blacklist providers and preserve evidence of the result before considering any exception.

EVIDENCE

- Operator identity is not independently verified in the available evidence.
- No licensing or registration claim is present on the captured homepage.
- The site's current page provides no official contact, corporate, or service information against which an independent validation can be matched.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The available evidence does not support treating the site as an established, accountable service, and the confirmed external threat signals require a security-first disposition.

Infrastructure Integrity

The website is protected by a CDN/WAF arrangement, and all observed addresses were edge infrastructure rather than an observable origin server. This limits direct origin exposure and may mitigate routine infrastructure attacks, but it is only a protective technical characteristic and does not offset the site's reputation risk.

Closing Assessment

Access should remain limited to passive observation; login, credential submission, financial transactions, and other sensitive interaction should not proceed unless independent investigation produces authoritative evidence that the current threat findings are erroneous and the operator is accountable.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of surun.info.

- The request stayed on surun.info. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by digitalocean.com, across 3 name servers. NOTED
- The registration is paid up to 2027-07-06. NOTED
- The earliest public archive of this site is from 2013-10-18. CLEAR
- It is hosted on DIGITALOCEAN-ASN, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about surun.info at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
