

# Is swedbank.se legit? TrustSniffer's high-trust assessment: 80/100

swedbank.se

## Verdict

80

OUT OF 100

HIGH TRUST

swedbank.se appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 75%.

What this site appears to be

Public-facing Swedish bank site (Swedbank) describing retail banking products: loans, mortgages, savings, investments, cards, pensions, insurance, and digital banking (BankID).

## Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2005.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

What is presented is the public-facing website of Swedbank, offering Swedish retail and corporate banking services including mortgages, personal loans, savings, investments, payment cards, pensions, insurance, and digital banking through BankID. Its apparent business model is conventional financial-services provision, monetized through interest margins, fees, lending, and related banking products.

### Scam/Impersonation Risk

No contradictions were observed between the site's stated banking purpose, its public content, and the available technical and reputational signals. The homepage presents a coherent corporate banking service rather than an unusual investment, cryptocurrency, or high-return proposition; no brand-impersonation, phishing, hidden-form, wallet-drainer, or suspicious behavioral indicators were identified. External reputation checks likewise found no malicious or suspicious detections, supporting a low scam and impersonation risk assessment. The available evidence remains consistent with an established, apparently legitimate website, although it does not independently verify the real-world operator identity.

#### EVIDENCE

- The homepage describes Swedbank retail and corporate banking services and provides navigation for customer service, security, and fraud-related support.
- Domain registration: 2002-11-20; approximately 23.74 years old.
- Web-archive record: 3,074 snapshots spanning 2005-04-28 to 2026-08-08, covering 22 years.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no phishing indicators.

### Regulatory Verification Notes

The site presents itself as a banking institution and provides substantial customer-facing information, but the reviewed material does not identify a specific license authority or registration number. This is a disclosure and verification point rather than evidence of deception. The domain is registered through CSC Corp Domains, and the long-running public presence, coherent banking content, and strong transport-security controls are consistent with an established site. No broker-dataset match or other third-party reputational warning was identified; such contextual checks do not constitute a regulatory determination.

#### EVIDENCE

- Domain registrar: CSC Corp Domains; registration year 2002 and expiration date 2026-11-20.
- Hosted on AS54113 (FASTLY - Fastly, Inc., US).
- TLS certificate: DigiCert EV RSA CA G2, EV validation, subject organization SWEDBANK AB, valid through 2027-01-28.
- The public banking content covers loans, deposits, investments, cards, pensions, insurance, and digital banking, with no content-level red flags recorded.

#### What to Verify Next

Before credential or payment interactions, an organization should independently confirm the applicable banking authorization through the relevant Swedish regulatory registry and ensure that the intended transaction is covered by appropriate payment-protection arrangements. Standard checks should also confirm the official merchant or institutional identity, applicable customer terms, complaint routes, and return or cancellation provisions where relevant. Contact channels should be confirmed through an independently sourced official route rather than relying solely on information encountered during an unsolicited interaction.

#### EVIDENCE

- The homepage contains customer-service and security-and-fraud navigation relevant to account-support verification.
- The captured homepage contained no sensitive submission form, hidden form, or untrusted form destination.
- Behavioral testing recorded 2 successful runs with 0 external posts and 0 non-whitelisted external XHR requests.

#### Summary Verdict

The website has a **high-trust, low-risk posture** and the available evidence is consistent with an established, apparently legitimate banking website. Its apparent legitimacy is well supported by converging content, historical, technical, behavioral, and external-reputation signals, while the real-world operator identity remains independently unverified.

#### Infrastructure Integrity

The site is protected by Fastly CDN/WAF infrastructure, with observed traffic terminating on CDN edge servers rather than a directly exposed origin. This reduces routine origin exposure and is a mitigating security control, but it is not by itself proof of legitimacy.

#### EVIDENCE

- Four observed IP addresses were identified as CDN edge endpoints; no origin candidate was identified.

#### Closing Assessment

Ordinary use may proceed on a proportionate basis, with independent identity, authorization, terms, and payment-protection checks completed before submitting credentials or initiating financial transactions.

## What the analysis found

No rule findings contributed to this verdict.

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of swedbank.se.

- The request stayed on swedbank.se. It was not redirected to another domain. CLEAR
- Registration is published under CSC Corp Domains. CLEAR
- DNS for this domain is served by nsone.net, across 4 name servers. NOTED
- The registration is paid up to 2026-11-20. NOTED
- The earliest public archive of this site is from 2005-04-28. CLEAR
- It is hosted on FASTLY, from a server in US. NOTED

## About this assessment

---

A trust score summarises the evidence TrustSniffer could collect about swedbank.se at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
