Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Japanese fashion e-commerce storefront affiliated with Takashimaya, offering apparel, footwear, bags, accessories, selected-brand goods, and outlet merchandise through a conventional retail model with displayed prices, discounts, category navigation, shopping-cart functionality, and customer accounts.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other fraud signals were observed. The long and continuous operating history, clean external reputation, and absence of deceptive financial or cryptocurrency content strongly support the conclusion that this is the authentic storefront it presents itself to be. Normal account login, purchasing, and other standard interactions are appropriate.

- The homepage contained no hidden forms, external password forms, credential-harvesting behavior, wallet requests, clipboard manipulation, cloaking, or suspicious inline scripts.
- Independent threat-reputation checks recorded 0 malicious and 0 suspicious classifications, with no phishing or confirmed threat-list match.
- Historical records contain 316 archive snapshots from 2017-10-25 through 2026-06-06, spanning 10 tracked years with no detected repurposing or semantic drift.
- The domain is approximately 8.77 years old, and the archive shows no gap longer than one year.

Regulatory Verification Notes

The site operates as an ordinary retailer rather than a financial, investment, brokerage, or crypto service, so no sector-specific financial license claim is presented or expected. Its homepage provides routes to company information, privacy materials, customer support, shipping and returns guidance, and statutory-commerce disclosures. No adverse broker-reputation match was identified; this is contextual corroboration rather than a legal or regulatory determination.

- The homepage links visitors to company, privacy, support, frequently asked questions, and statutory-commerce information.
- Shipping thresholds, delivery notices, returns information, and customer-service routes are presented as part of the retail journey.
- The transport certificate uses organization validation and identifies SELECT SQUARE, CO., LTD. as the certificate subject organization.

- No financial products, tokens, investment returns, trading facilities, or licensing claims appear in the supplied homepage content.

What to Verify Next

For material procurement or enterprise onboarding, the legal entity stated in the statutory-commerce materials should be matched to invoices, payment-recipient details, and contractual documentation. Buyers should also confirm the applicable return conditions and delivery notices for the particular item and destination, while official support channels can be retained independently for order-related disputes.

- The homepage advertises free shipping for purchases of at least ¥5,000 including tax, making the published checkout conditions relevant to order validation.
- Dated notices on the homepage address earthquake-related delivery delays, distribution-centre inventory work, and sale-period dispatch arrangements.
- Account registration enables notifications for price reductions, coupons, and restocking, while favourites can also be used without membership.
- The storefront links to associated Takashimaya retail properties and established social platforms, providing additional channels for confirming brand continuity.

Summary Verdict

This is a legitimate, established, and trustworthy retail website. Its coherent commercial identity, sustained operating footprint, clean reputation, substantive customer-facing content, and absence of contradictory signals support a high-confidence posture suitable for normal use.

Infrastructure Integrity

The site is hosted on identified Amazon infrastructure and uses a valid organization-validated TLS certificate. These controls provide sound transport security and accountable hosting, although infrastructure quality is treated as supporting mitigation rather than standalone proof of legitimacy.

- The hosting infrastructure serves the site from AS16509 (AMAZON-02 — Amazon.com, Inc., US), at 18.180.216.63.
- The site’s TLS certificate was issued by GeoTrust TLS RSA CA G1 with OV validation and is valid until 2026-11-19.

Closing Assessment

Prospective customers may proceed with normal browsing, account login, and standard retail transactions, applying routine e-commerce controls such as retaining order confirmations and using payment methods with customary dispute protection.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100

Identity verification confidence	76%
----------------------------------	-----

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of t-fashion.jp.

- The request stayed on t-fashion.jp. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2017-10-25. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about t-fashion.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
