Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

TabNews is a Portuguese-language developer community platform presenting programming and technology articles, discussions, rankings, and user-submitted links, with an apparent business model centered on community participation and technology content rather than direct financial returns.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent developer-community identity, with programming, artificial intelligence, software development, and open-source topics; available checks found no phishing, impersonation, malicious-content, or suspicious-behavior indicators. Normal account login and standard interaction are appropriate.

- The homepage identifies TabNews as a community for programming and technology professionals and displays user-generated posts, rankings, comments, and login/registration options.
- Behavioral testing recorded no hidden forms, external password submissions, wallet-drainer activity, clipboard hijacking, cloaking, or suspicious inline scripts.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing match.

Regulatory Verification Notes

The available content describes an informational technology community rather than a regulated financial service, and no financial-return promise or licensing claim is evident. The site's identity and operating purpose are consistent across the observed homepage content. Registration and transport-encryption telemetry further support an established, technically maintained service; the absence of financial licensing language is therefore a limited transparency consideration rather than an indication of wrongdoing.

- Domain registered on 2020-10-16, approximately 5.8 years old, with registration extending to 2032-10-16.
- TLS certificate issued by WE1 at DV validation level, valid through 2026-09-17.
- Hosting telemetry identifies AS13335 and Cloudflare, Inc. in the United States.
- The homepage contains approximately 4,519 characters of substantive community content and presents no direct monetization or financial-return promise.

What to Verify Next

For institutional onboarding, independently confirm the official domain through an established organizational contact or trusted external reference, and review the site's own terms and privacy materials before formal reliance. User-submitted external links should be assessed according to their individual destinations.

- The homepage contains user-generated posts and links related to programming and technology.

- The available page analysis found no sensitive forms or untrusted form destinations.
- No third-party broker match was identified.

Summary Verdict

TabNews presents as a legitimate, established, low-risk technology community with a coherent identity and no observed scam, phishing, impersonation, or malicious-content indicators. Its content and operating model are consistent with an informational developer platform, supporting normal use.

Infrastructure Integrity

The site is protected by Cloudflare's CDN/WAF infrastructure, with observed addresses resolving to Cloudflare edge servers on AS13335 and no origin candidate identified. This reduces direct exposure of the underlying host and is a mitigating infrastructure characteristic, not independent proof of legitimacy.

Closing Assessment

Normal browsing, account login, and standard account activity are appropriate; formal enterprise use should follow the organization's routine supplier and content-link validation procedures.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tabnews.com.br.

- The request stayed on tabnews.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2032-10-16. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tabnews.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
