

Is tailoy.com.pe legit? TrustSniffer's high-trust assessment: 90/100

tailoy.com.pe

Verdict

90

OUT OF 100

HIGH TRUST

tailoy.com.pe appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

A Spanish-language ecommerce storefront listing many product categories (toys, electronics, baby, home, art). Contains shopping cart hints and login link; appears to be a product catalog/home page rather than a login-only or investment page.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This Spanish-language ecommerce website presents the Tai Loy storefront, with categories spanning toys, technology, televisions, art, baby products, home goods, and stationery, together with search, shopping-cart, order-tracking, and customer-login functions. Its apparent business model is direct online retail of physical goods through a catalogue and checkout flow.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other confirmed contradiction was observed. The storefront behaves like a conventional retail catalogue rather than a login-only, investment, cryptocurrency, or financial-scheme site. Automated testing did record hidden forms and suspicious inline scripts, but the supplied behavioral evidence did not identify an external password destination, wallet-draining behavior, cloaking, clipboard interception, or a suspicious brand-impersonation pattern; these signals therefore remain implementation anomalies rather than evidence of a scam. External reputation checks were clean, with no malicious or suspicious detections and no reported abuse activity, supporting a low scam/impersonation risk posture.

EVIDENCE

- The homepage title and visible catalogue content identify a Spanish-language retail storefront offering toys, art, technology, televisions, and related household categories.
- Behavioral testing completed successfully in two runs; it recorded two hidden forms and two suspicious inline scripts, while recording zero external password forms, zero wallet-connect runs, zero wallet-drainer runs, and no cloaking.
- External reputation evaluation recorded zero malicious detections, zero suspicious detections, no Google Safe Browsing malicious result, and no blacklist hit; the domain was ranked 73383 and was within the top 1 million.

Regulatory Verification Notes

The available evidence is consistent with an established retail website, but it does not independently verify the real-world operator. The registration record identifies the registrar as NIC.PE and the registrant as “tai loy s.a.”; that record is a useful identity lead, not proof of corporate control or affiliation. No financial-services licensing claim or license number is evidenced in the supplied storefront material, which is a disclosure point to resolve if the engagement involves regulated products or payment-related obligations. The available third-party broker

dataset returned no match and should be treated only as contextual reputational information, not as a licensing determination.

EVIDENCE

- Domain continuity dates to 2004, with an authoritative age of 21.67 years.
- The web archive contains 479 snapshots spanning 2004–2026, with 23 years tracked.
- The registration record names NIC.PE as registrar and “tai loy s.a.” as registrant.
- The site is hosted on AS14618, operated by AMAZON-AES—Amazon.com, Inc.; its TLS certificate is issued by Amazon RSA 2048 M01 at DV validation level and is valid to 2027-01-20.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm that the merchant identity shown in the checkout, order-confirmation, and customer-service materials corresponds to the intended business. The applicable return, refund, delivery, and payment-protection terms should be reviewed, and any claimed corporate or consumer-protection registration should be checked with the relevant official registry. Payment methods offering dispute or chargeback protection should be preferred for initial transactions, particularly where the transaction value is material.

EVIDENCE

- The homepage exposes separate “Sigue tu Pedido,” “Mi carrito,” and “Inicia sesión” interaction paths, creating distinct order, payment, and credential surfaces for review.
- The available page analysis identifies a direct-sales checkout model rather than a subscription, investment, or token-based transaction model.
- The site’s real-world operator remains independently unverified in the available evidence, making merchant-identity confirmation the principal outstanding validation step.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate ecommerce website. No scam, phishing, impersonation, blacklist, or conflicting-identity signal was observed, although the operator connection is not independently proven.

Infrastructure Integrity

The website is protected by Amazon Web Services CDN/WAF infrastructure, and the observed addresses were CDN edge addresses rather than an exposed origin address. This is a mitigating control that reduces direct origin exposure, but it is infrastructure protection rather than proof of merchant legitimacy.

EVIDENCE

- AWS CDN/WAF protection was observed with two edge addresses: 44.195.130.188 and 44.215.62.52.
- Both observed edge addresses were associated with AS14618; no likely origin IP candidate was identified.

Closing Assessment

Normal browsing and ordinary retail use are proportionate to the assessed posture, while independent merchant-identity, transaction-term, and payment-protection checks should precede credential submission or payment for significant purchases.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tailoy.com.pe.

- The request stayed on tailoy.com.pe. It was not redirected to another domain. CLEAR
- Registration is published under NIC.PE. CLEAR
- DNS for this domain is served by awsdns-30.org, across 4 name servers. NOTED
- The earliest public archive of this site is from 2004-12-09. CLEAR
- It is hosted on AMAZON-AES, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [tailoy.com.pe](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
