Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2016.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

The website is an established Arabic-language Moroccan electronic newspaper presenting regional and national reporting across politics, education, public safety, sport, culture, health, weather, economics, and tourism, with an apparent readership-supported media model that may include advertising or sponsored placements.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other fraud signals were observed. The site's long-established domain, continuous historical presence, recognized traffic footprint, clean external threat reputation, content-rich editorial format, and benign browser behavior converge strongly in support of legitimacy. The homepage contains no login form, concealed form, sensitive-data collection mechanism, cryptocurrency functionality, or suspicious script behavior.

- Domain records show registration through HEBERFACILE on 29 August 2016, making the domain approximately 9.92 years old.
- Historical records contain 309 archive snapshots spanning 9 September 2016 to 6 June 2026, covering 11 tracked years without evidence of suspicious repurposing.
- External reputation screening recorded no malicious or suspicious detections, and the domain has a top-one-million global traffic footprint.
- Behavioral examination of the homepage completed two successful runs without cloaking, hidden forms, clipboard hijacking, wallet interaction, or suspicious inline scripts.

Regulatory Verification Notes

The site identifies itself on the homepage as an independent electronic newspaper. The supplied content does not present a corporate registration number, media authorization, or licensing claim; for a general news publisher, this is a limited disclosure matter rather than evidence of impersonation or unlawful activity. No conflicting legal-entity names or adverse broker associations were identified, while the named registrant and stable technical registration provide additional identity continuity.

- The homepage title identifies the publication as "Taxi News" and describes it as an independent electronic newspaper.
- Domain registration records name Jamal Maiss as the registrant and HEBERFACILE as the registrar, with expiration recorded as 29 August 2026.
- The hosting infrastructure is served from AS16276 by OVH SAS in France.
- The site's transport encryption uses a valid YE1-issued domain-validated TLS certificate, valid until 1 October 2026.

What to Verify Next

For institutional advertising, syndication, procurement, or other contractual engagement, routine onboarding should confirm the contracting publisher’s legal name, authorized representative, billing details, and editorial responsibility. Commercial approaches should also be validated through an independently confirmed official contact channel before funds or unpublished material are transferred.

- The homepage navigation provides a dedicated contact route for publisher communications.
- The site publishes timestamped current reporting and maintains a distinct “Taxi News TV” editorial category.
- The website operates on WordPress, consistent with a conventional digital-publishing platform.

Summary Verdict

The website is a legitimate, established, and trustworthy news publication with strong convergence across provenance, content quality, reputation, and observed behavior. No contradictory risk signals were found. Normal interaction, including account login if offered and standard use, is appropriate.

Infrastructure Integrity

The site is protected through a CDN/WAF configuration, with the observed address functioning as an edge endpoint and the origin not exposed during the assessment. This reduces direct infrastructure exposure and is a mitigating security control, although protective hosting alone is not proof of legitimacy.

Closing Assessment

Prospective users may engage with the publication normally, while institutional or commercial relationships should proceed through standard counterparty and payment-control procedures.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of taxinews.ma.

- The request stayed on taxinews.ma. It was not redirected to another domain. CLEAR
- Registration is published under HEBERFACILE. CLEAR
- DNS for this domain is served by ovh.net, across 2 name servers. NOTED
- The registration is paid up to 2026-08-29. NOTED

- The earliest public archive of this site is from 2016-09-09. [CLEAR](#)
- It is hosted on OVH, from a server in FR. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about taxinews.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
