Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2006.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a public-facing marketplace for teacher-created K–12 educational resources, presenting lesson plans, classroom materials, grade- and subject-based categories, product prices, ratings, and standard shopping functions. Its apparent business model is to facilitate purchases from independent resource sellers while generating revenue through item sales, seller commissions, and related marketplace services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent educational-commerce model, with ordinary browsing, search, login, signup, cart, wishlist, and checkout functions; the supplied page analysis identified no phishing, brand-impersonation, credential-harvesting, or other fraud indicators. External reputation checks were clean, with no malicious or suspicious detections, no blacklist finding, and no reported abuse activity associated with the observed hosting context. The domain's long registration continuity and substantial historical presence further support an established provenance rather than a recently created impersonation site.

EVIDENCE

- Homepage: no red flags were identified, and the site was classified as a low-risk educational marketplace.
- Homepage behavior: no hidden forms, external password submissions, wallet activity, clipboard manipulation, or cloaking were detected.
- Domain registration: registered 2005-11-01 (~20.79 years old).
- Web archive: 5,000 snapshots spanning 2006-02-09 to 2021-02-11 (16 years tracked).

Regulatory Verification Notes

The supplied pages include standard privacy and terms links and present a conventional marketplace structure, but no regulated license, registration number, or licensing authority is claimed or independently verified in the available material. For an educational marketplace, this is primarily a disclosure and merchant-verification matter rather than evidence of deception. The available evidence is consistent with an established, apparently legitimate site, while the real-world operating entity should not be treated as independently proven solely from the website presentation.

EVIDENCE

- Homepage and site navigation: links are provided to the About, Help, privacy, and terms areas alongside ordinary marketplace functions.
- Technical hosting: served from AS14618 (Amazon.com, Inc.; Amazon Technologies, US).
- Site transport encryption: TLS certificate issued by Amazon RSA 2048 M01, validation level DV, valid to 2027-01-27.
- Domain registration record: registrar identified as 101domain.

What to Verify Next

Before credential or payment interactions, an enterprise or consumer should independently confirm the merchant entity named in the site's legal or About materials, review the applicable returns, refunds, seller-dispute, and payment-protection terms, and confirm that the intended payment flow remains within the official site. Official support and contact channels should be validated through an independent route, and any representation that a particular seller or resource provider is authorized should be checked against the seller's own published information.

EVIDENCE

- Legal and identity pages: review the named operating entity and any applicable business-registration disclosures.
- Commerce flow: inspect the checkout, refund, cancellation, and dispute provisions before completing a purchase.
- Account flow: confirm that login and signup remain on the official domain and use the site's stated security and recovery procedures.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-contradiction indicators were observed, although the operator's real-world identity remains likely rather than independently verified.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, with all observed addresses associated with Amazon's edge network and no origin server address observable in the analysis. This provides a meaningful mitigation against direct exposure and common network-level abuse, but remains a protective infrastructure characteristic rather than proof of legitimacy.

Closing Assessment

Ordinary marketplace use is proportionate to the assessed posture, subject to routine independent checks of merchant identity, transaction protections, and official account channels before sensitive interactions.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of teacherspayteachers.com.

- The request stayed on teacherspayteachers.com. It was not redirected to another domain. CLEAR
- Registration is published under https://www.101domain.com/. CLEAR
- DNS for this domain is served by awsdns-19.org, across 4 name servers. NOTED
- The registration is paid up to 2026-11-01. NOTED
- The earliest public archive of this site is from 2006-02-09. CLEAR
- It is hosted on AMAZON-AES, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about teacherspayteachers.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were

consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
