

Is tech.co legit? TrustSniffer's high-trust assessment: 99/100

tech.co

Verdict

99

OUT OF 100

HIGH TRUST

tech.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Article landing and navigation page for Tech.co, a technology news and guides publisher. Contains editorial content, category lists, social links, and standard corporate footer with contact and legal information.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Tech.co is a technology news and advice publisher presenting editorial coverage, reviews, and practical guides across areas including artificial intelligence, cybersecurity, business software, hospitality technology, and cloud collaboration; its apparent business model is advertising-, sponsored-content-, and affiliate-supported publishing.

Scam/Impersonation Risk

No contradictions were observed across the available evidence: there were no phishing indicators, confirmed impersonation findings, conflicting legal identities, or malicious reputation results. The homepage presents coherent editorial content, category navigation, social links, and legal/contact pathways rather than a transactional or credential-harvesting interface. A superficial similarity signal associated with t.me was not corroborated by the site's content, which was classified as an established news and editorial publisher, and no cloaking, hidden forms, wallet activity, or other abuse-ready behavior was detected. The available evidence is therefore consistent with an apparently legitimate, low-risk website, while independently verifying the real-world operator remains appropriate.

EVIDENCE

- The homepage is classified as “News / Editorial” and contains technology news, reviews, guides, category navigation, and standard corporate footer information.
- Reputation telemetry recorded 0 malicious and 0 suspicious detections, with 0 abuse reports associated with the observed content-delivery infrastructure.
- The domain was registered in 2010 and is approximately 16.33 years old.
- The site has a global traffic rank of 28220 and is within the top 1,000,000 domains.

Regulatory Verification Notes

Tech.co presents itself as an informational publisher rather than a financial, brokerage, or other regulated-service provider. The available page content does not claim a regulatory license or display a license number; this is a disclosure point to clarify if a specific regulated service is ever promoted, but it is not evidence of scam activity in the present publisher context. The footer provides contact and legal information, while the registration record identifies Marketing VF Ltd as the organization and Gandi SAS as registrar; the registrant name is privacy-protected, which is an administrative identity limitation rather than an identity contradiction. A high page-authority signal, coherent editorial structure, established social presence, and clean external reputation support the site's apparent legitimacy, although they do not independently prove the operator's legal identity.

EVIDENCE

- The homepage footer provides contact and legal-information pathways, including links to About Us, Contact Us, and Privacy Policy pages.
- The registration record shows Gandi SAS as registrar, Marketing VF Ltd as the organization, creation date 2010-04-22T17:08:46Z, and expiration date 2027-04-21T23:59:59Z.
- The site is served from AS54113 (FASTLY - Fastly, Inc., US).
- The transport certificate is issued by YR2, uses DV validation, and is valid to 2026-11-01T11:09:37+00:00.

What to Verify Next

Before any credential or payment interaction associated with an affiliate offer, independently confirm the publisher's legal entity and the applicable commercial disclosures through contact details obtained from an independent source. Review the relevant merchant's return, refund, privacy, and payment-protection terms rather than relying solely on an editorial recommendation. Where an article concerns a regulated product or service, confirm the named provider's authorization directly with the applicable official registry.

EVIDENCE

- The About Us, Contact Us, Privacy Policy, and legal-information pathways provide defined locations for confirming site disclosures.
- The homepage describes an advertising- and affiliate-supported publishing model, making separation between editorial material, sponsored content, and referral offers a relevant verification point.
- The available homepage capture contains no account, password, or payment form, so any later interaction involving such data should be assessed in the specific linked service rather than inferred from the publisher page.

Summary Verdict

The available evidence supports a high-trust, low-risk posture for Tech.co as an established, apparently legitimate technology publisher. Its coherent content model and converging reputation, domain, authority, and technical signals provide strong support for normal informational use, but the real-world operator identity is not independently verified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF services, with observed addresses belonging to CDN edge infrastructure and no origin candidate identified in the analysis. This layered delivery posture is a mitigating security factor that reduces direct exposure of the underlying service, but it is not independent proof of organizational legitimacy.

EVIDENCE

- The observed infrastructure includes Cloudflare CDN/WAF protection and Fastly edge delivery; all 8 observed IP addresses were classified as CDN edge addresses, with 0 likely origin addresses.

Closing Assessment

Credential or payment interactions should follow ordinary independent checks of merchant identity, commercial terms, and available payment protections before proceeding.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tech.co.

- The request stayed on tech.co. It was not redirected to another domain. CLEAR
- Registration is published under Gandi SAS. CLEAR
- DNS for this domain is served by awsdns-00.org, across 4 name servers. NOTED
- The registration is paid up to 2027-04-21. NOTED
- It is hosted on FASTLY, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tech.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
