

Is technowizards.io a scam? TrustSniffer's high-risk assessment: 0/100

technowizards.io

Verdict

0

OUT OF 100

CRITICAL RISK

technowizards.io shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Marketing site for TechnoWizards, an AI chatbot and messaging platform offering SMS, voice, omnichannel, and chatbot products for enterprise verticals with demo/contact CTAs and case studies.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	3 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED

The page as captured

https://www.technowizards.io/

What technowizards.io served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a corporate marketing site for TechnoWizards, presenting B2B software and services for AI chatbots, SMS, voice communications, omnichannel customer support, and related integrations. Its apparent business model is to generate enterprise sales through product subscriptions, bespoke services, case studies, pricing information, and demo or contact requests.

Scam/Impersonation Risk

Confirmed external reputation contradictions materially elevate the risk of sensitive interaction with this website. Independent threat-intelligence checks recorded malicious detections and a confirmed blacklist status, although the website's visible content itself presents a conventional SaaS offering rather than an obvious impersonation, phishing page, cryptocurrency scheme, or deceptive financial promotion. The homepage promotes WizPack SMS, WizReach omnichannel messaging, WizTone voice solutions, and WizGenie chatbots for WhatsApp, Shopify, Instagram, and general AI use, alongside enterprise case studies; this coherent

commercial presentation does not offset the external detections. No conflicting legal-entity names or confirmed brand impersonation were observed, but the operator's real-world identity remains unverified.

EVIDENCE

- The homepage presents WizPack, WizReach, WizTone, and WizGenie products, enterprise integrations, industry solutions, and case studies.
- External reputation checks recorded 3 malicious detections and a confirmed blacklist status.
- The domain was registered on 2022-11-21 and has an age of 3.75 years.

Regulatory Verification Notes

The site presents itself as a B2B technology provider serving education, government, and banking-related use cases, but the available evidence does not independently establish the operating legal entity. No regulatory license or registration number is claimed in the supplied business information, which is a material verification gap for any service involving regulated-sector customers or sensitive communications. The available TLS and hosting telemetry confirms technical deployment, not corporate legitimacy or regulatory authorization.

EVIDENCE

- The homepage describes AI chatbot, SMS, voice, and omnichannel services and includes banking and government industry content.
- The business profile records no claimed license, licensing authority, or license number.
- The site's TLS certificate is Domain Validated, issued by Sectigo Public Server Authentication CA DV R36, and valid until 2027-01-29.

What to Verify Next

Before any account, credential, data-submission, or commercial engagement, independently confirm the operator's registered legal name, business address, and authority to provide the advertised services through official corporate and regulatory registries. Contact details should be validated through an independently sourced channel rather than relying solely on the website. Until those checks are completed, interaction should remain limited to non-sensitive, read-only review; credentials and financial information should not be submitted.

EVIDENCE

- The site navigation provides separate About Us, Contact Us, Pricing, login, and demo-request routes for independent cross-checking.
- The homepage includes a contact/demo workflow and a sign-in route, creating sensitive interaction points that require validation.

Summary Verdict

The overall posture is **critical risk**, with the available evidence insufficient to support safe sensitive interaction or to establish a verified operating identity. The polished SaaS presentation is outweighed by confirmed external reputation contradictions, so the website should not be treated as trustworthy for credentials, confidential information, or financial engagement.

Infrastructure Integrity

The site is hosted by PDR Ltd. d/b/a PublicDomainRegistry.com, with no trusted CDN or WAF detected in the supplied infrastructure evidence. The transport layer is protected by a valid Domain Validated certificate, but that technical control is only a mitigating security measure and does not resolve the external reputation concern.

EVIDENCE

- Served from AS394695, PUBLIC-DOMAIN-REGISTRY - PDR, US.
- Infrastructure resolution identified 1 unique IP and no detected CDN or WAF.

Closing Assessment

Prospective users should suspend sensitive interaction and require independent corporate, contact-channel, and regulatory confirmation before considering any business engagement.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence

25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of technowizards.io.

- The request stayed on technowizards.io. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by bigrockservers.com, across 2 name servers. NOTED
- The registration is paid up to 2027-11-21. CLEAR
- The earliest public archive of this site is from 2024-04-27. CLEAR
- It is hosted on PUBLIC-DOMAIN-REGISTRY, from a server in SC. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about technowizards.io at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
