

Is tecmilenio.mx legit? TrustSniffer's high-trust assessment: 90/100

tecmilenio.mx

Verdict

90

OUT OF 100

HIGH TRUST

tecmilenio.mx appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

WHAT THIS SITE APPEARS TO BE

University marketing page listing many programs, campuses, modalities and campaign identifiers; includes a lead capture form requesting name, phone and email for prospective students.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a Universidad Tecmilenio higher-education marketing and enrollment website presenting academic programs, campus locations, study modalities, and application pathways for prospective students.

Scam/Impersonation Risk

No contradictions were observed. The site's university-focused content is coherent across its program, campus, and modality information, and the available analysis found no phishing, brand-impersonation, malicious-content, or blacklist indicators. Its established domain continuity, substantial historical presence, clean external reputation checks, and apparent traffic footprint collectively support an evidence-consistent view of an established, apparently legitimate website. The observed external network activity and implementation errors are operational signals associated with a marketing and lead-generation page, not evidence of impersonation, particularly because no login form, hidden form, wallet activity, or cloaking was detected.

EVIDENCE

- The homepage presents the "Universidad Tecmilenio" identity, degree and postgraduate offerings, campus locations, and presencial, online, hybrid, and self-directed study formats.
- Domain registration evidence: registered 2009-05-31; approximately 17.21 years old; expiration 2027-05-30.
- Archive evidence: 374 snapshots spanning 2009-10-13 to 2017-12-03, covering 9 years with a maximum observed gap of 1 year.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, no Google Safe Browsing malicious result, and no blacklist match.

Regulatory Verification Notes

The site presents an education and student-enrollment business model rather than a financial service. The available page content identifies Universidad Tecmilenio and provides extensive academic and campus information, but no licensing claim, registration number, or regulatory authority was identified; this is a disclosure and verification gap, not evidence of a scam. The real-world operator identity remains independently unverified, although the registration record names Instituto Tecnológico y de Estudios Superiores de Monterrey and the certificate subject organization is Enseñanza e Investigación Superior AC. These names should be treated as supporting administrative signals rather than conclusive proof that the website operator and those entities are the same.

EVIDENCE

- Domain registration record: registrar AKKY ONLINE SOLUTIONS, S.A. DE C.V.; registrant listed as Instituto Tecnológico y de Estudios Superiores de Monterrey.
- Hosting telemetry: served from AS19551, INCAPSULA - Incapsula Inc, US.
- Transport security telemetry: DigiCert Global G2 TLS RSA SHA256 2020 CA1 certificate, OV validation, subject organization Enseñanza e Investigación Superior AC, valid to 2026-10-23T23:59:59+00:00.
- The university marketing page contains one lead-capture form requesting prospective-student information, while no licensing authority or license number is presented in the supplied content.

What to Verify Next

Before credential or payment interactions, an independent admissions or institutional channel should confirm that the displayed university identity, program information, and enrollment process correspond to the intended institution. Any applicable education-sector authorization should be checked against the relevant official registry, and published terms concerning cancellations, refunds, or other payment protections should be reviewed before a paid enrollment commitment. The lead-capture workflow should also be limited to information necessary for the admissions inquiry until those checks are complete.

EVIDENCE

- The application page is a lead-capture workflow requesting name, telephone number, email address, interest level, campus, and program.
- The page offers multiple enrollment modalities and a broad campus list, making an independent match against official institutional admissions information practicable.
- The supplied content identifies education programs and enrollment conversion as the business purpose, with no financial-product or cryptocurrency functionality detected.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate university website. The classification is strong, while the connection between the website and a specific real-world operator remains unverified rather than proven.

Infrastructure Integrity

The website is protected by Incapsula CDN/WAF infrastructure, with observed edge addresses 45.60.115.212 and 45.60.86.212; both resolve through AS19551, and no origin-server candidate was observed. This architecture is a positive protective control that reduces direct exposure of the origin environment, but it is a mitigating infrastructure signal rather than proof of institutional legitimacy.

Closing Assessment

Proceed with ordinary independent institution, terms, and payment-protection checks before submitting credentials or completing a paid enrollment interaction.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tecmilenio.mx.

- The request stayed on tecmilenio.mx. It was not redirected to another domain. CLEAR
- Registration is published under AKKY ONLINE SOLUTIONS, S.A. DE C.V.. CLEAR
- DNS for this domain is served by 42.250, across 2 name servers. NOTED
- The registration is paid up to 2027-05-30. NOTED
- The earliest public archive of this site is from 2009-10-13. CLEAR
- It is hosted on INCAPSULA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tecmilenio.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
