- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Tecnobank is a Brazilian B2B technology company providing digital infrastructure for vehicle-financing contract registration, guarantee and data services, with a corporate website presenting its solutions, security controls, privacy commitments, compliance program, customer channels, news, physical address and CNPJ.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate identity, a specific B2B operating model and established service themes rather than consumer investment, deposit-taking or deceptive financial-promotional claims. The contact page provides a standard contact form without sensitive-data collection, and observed site behavior showed no login abuse, hidden forms, wallet activity, cloaking or suspicious external activity.

- Homepage: identifies Tecnobank as a provider of digital vehicle-financing registration solutions and describes security and compliance commitments.
- Contact page: provides corporate contact and customer-service channels through a standard contact form.
- Site behavior: recorded zero external network activity, zero hidden forms and no wallet-related activity across two successful runs.
- Domain registration: created 2008-04-17 and currently approximately 18.3 years old, expiring 2036-04-17.

Regulatory Verification Notes

The legal and corporate presentation is substantive, including a named company, CNPJ, physical address, privacy and LGPD references, security certifications and a compliance program. No specific financial-services license or registration number is claimed on the reviewed pages; this is a limited disclosure point for regulatory confirmation, not evidence of impersonation or fraud. The company's stated B2B technology model is consistent with services delivered to financial institutions rather than consumer investment returns.

- Corporate pages: identify Tecnobank, provide a physical address and CNPJ, and describe its compliance and privacy framework.
- Homepage: states that the infrastructure supports financial institutions and emphasizes information security and privacy standards.
- Archive record: 146 snapshots spanning 2014–2026, covering 13 tracked years.
- Hosting and transport: served from AS20940 (Akamai International B.V., NL); TLS issued by DigiCert Global G3 TLS ECC SHA384 2020 CA1, using OV validation and valid to 2027-02-16.

What to Verify Next

For a regulated engagement, the relevant contracting institution should confirm any sector-specific authorization or registration directly with the applicable Brazilian registry and validate the company’s CNPJ and contracting entity through independent corporate records. Business counterparties should also confirm official contact channels using previously established institutional records before exchanging sensitive documentation.

- Legal and compliance pages: provide the stated corporate identity, CNPJ, privacy information and compliance positioning.
- Contact page: supplies the channels that should be reconciled against independently held institutional records.
- The reviewed site presents one contact form and no sensitive form destination.

Summary Verdict

The website presents as a legitimate, established and trustworthy corporate technology provider. Its coherent business identity, sustained historical presence, clean observed behavior and consistent corporate disclosures support normal interaction, including account login and standard use.

Infrastructure Integrity

The site is protected by Akamai CDN/WAF infrastructure, with observed edge service addresses and no origin candidates identified. This provides a meaningful protective layer against direct origin exposure and common web abuse, while remaining a mitigating infrastructure signal rather than proof of legitimacy.

Closing Assessment

Normal business interaction is appropriate, with ordinary institutional controls applied to licensing confirmation, contracting and sensitive information exchange.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tecnobank.com.br.

- The request stayed on tecnobank.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by akam.net, across 6 name servers. NOTED

- The registration is paid up to 2036-04-17. CLEAR
- The earliest public archive of this site is from 2014-05-17. CLEAR
- It is hosted on AKAMAI-ASN1, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tecnobank.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
