

Is tecomgroup.ru legit? TrustSniffer's high-trust assessment: 100/100

tecomgroup.ru

Verdict

100

OUT OF 100

HIGH TRUST

tecomgroup.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-looking corporate website for Tecom, a long-established Russian IT and telecommunications systems integrator. The company presents proprietary monitoring, network management, broadcasting, media-quality, AI content-detection, and custom software solutions, along with projects for major organizations and business contact information.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the corporate site of Tecom, a long-established Russian IT and telecommunications systems integrator presenting enterprise software, infrastructure monitoring, broadcasting solutions, AI-based content detection, systems integration, and custom development services for business and institutional customers.

Scam/Impersonation Risk

No contradictions, phishing indicators, impersonation evidence, or confirmed blacklist findings were observed. The homepage presents a coherent B2B technology model, including ORBOX media-quality control, SRT Agent protocol conversion, ProFinder AI content detection, industrial network monitoring, resource management, SDN, broadcasting monitoring, installation services, and custom software development. The commercial model is consistent with enterprise technology delivery rather than deceptive financial solicitation, and external reputation checks were clean.

- The homepage identifies Tecom and describes enterprise products, projects, services, careers, accreditation, documents, and business contacts.
- The domain was registered on 2003-10-09 and is approximately 22.83 years old.
- Historical coverage contains 206 archive snapshots spanning 2004–2026, across 23 tracked years.
- External reputation checks recorded 0 malicious and 0 suspicious detections; traffic rank was 102,890, within the global top one million.

Regulatory Verification Notes

The site presents itself as a corporate technology provider rather than a regulated financial service. No licensing claim or license number is supplied in the available evidence; this is a limited disclosure point for procurement or regulated engagements, not an indication of fraud. The long-established registration, reputable registrar, stable technical identity, and valid transport encryption support the conclusion that the site represents an established operating entity. No broker-dataset match was identified.

- Domain registration is held through RU-CENTER-RU, with expiration recorded as 2026-10-10.
- The site is served from AS57724, operated by DDOS-GUARD - DDOS-GUARD LTD, RU.
- TLS uses issuer YR2 with DV validation and is valid through 2026-09-10.
- The homepage provides company, project, service, document, accreditation, and contact pathways.

What to Verify Next

For a formal engagement, procurement should confirm the contracting legal entity and applicable authorization requirements against the relevant corporate or sector registry. Contractual, payment, and delivery details should be validated through the company’s documented business channels and standard supplier-onboarding controls.

- The homepage exposes dedicated company, projects, accreditation, documents, partner, and contact sections.
- The stated business model is enterprise software, systems integration, monitoring, installation, and custom development.
- No sensitive login or payment form was observed on the analyzed homepage.

Summary Verdict

The website presents a legitimate, established, and trustworthy corporate profile with no observed scam or impersonation indicators. Normal interaction, including account login and standard business use where applicable, is appropriate.

Infrastructure Integrity

The site resolves directly to infrastructure operated by DDOS-GUARD, with no CDN or WAF edge layer identified and one apparent origin address. This hosting arrangement provides some protective mitigation, but infrastructure protection alone is not a legitimacy determination.

Closing Assessment

Prospective users may proceed with normal interaction and standard commercial engagement, applying ordinary enterprise procurement and contract controls for material transactions.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tecomgroup.ru.

- The request stayed on tecomgroup.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by ru., across 5 name servers. NOTED

- The registration is paid up to 2026-10-10. NOTED
- The earliest public archive of this site is from 2004-04-21. CLEAR
- It is hosted on DDOS-GUARD, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tecomgroup.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
