Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a corporate telecommunications portal for Kazakhtelecom, presenting internet, mobile, television, payment, equipment, customer-support, company, and investor services for consumers and businesses.

Scam/Impersonation Risk

No contradictions, phishing indicators, impersonation signals, or confirmed malicious-reputation findings were observed. The homepage presents a coherent telecommunications business model with service descriptions, pricing context, support channels, payment functionality, and company information; its established historical continuity and clean external reputation are consistent with a legitimate operating website.

- The homepage identifies Kazakhtelecom and provides consumer, business, company, investor, support, payment, and service-navigation content.
- The domain was first observed in 2000 and is 25.87542778918549 years old.
- The site has 1,013 archive snapshots spanning 2000–2026, with 27 years tracked.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing hit.

Regulatory Verification Notes

The site provides company, investor, sustainability, address, contact, and support sections, supporting a transparent corporate presentation. The supplied page evidence does not show a claimed license number or specific regulatory authorization; this is a verification item rather than evidence of deception. No adverse third-party broker match was identified.

- The homepage links to “Company,” “Investors and shareholders,” “Sustainability,” and regional address-and-contact information.
- The site’s business model is subscription-based telecommunications, including internet, mobile, television, hosting, equipment, and service payments.
- Hosted on AS9198 (KAZTELECOM-AS - JSC Kazakhtelecom, KZ).
- TLS certificate issued by GoGetSSL RSA DV CA (DV), valid to 2027-01-15T23:59:59+00:00.

What to Verify Next

For regulated procurement or material commercial engagement, confirm any applicable telecommunications authorization and corporate details through the relevant official registry. Independently confirm official support and payment channels before significant transactions, and retain transaction records.

- The homepage includes a payment form collecting a personal account number and payment amount in tenge.

- Support, contact, regional-location, and mobile-application pathways are presented on the homepage.
- The site offers Kazakh, Russian, and English language options.

Summary Verdict

The website presents a high-confidence, established corporate identity with strong alignment between its stated services, historical continuity, technical operation, and external reputation. No scam, impersonation, phishing, or material contradiction was identified, and normal interaction—including account login and standard use—is appropriate.

Infrastructure Integrity

The site resolves directly to a Kazakhtelecom-hosted origin on AS9198, with no CDN or WAF identified. Its valid mainstream-issued TLS certificate provides transport protection, while the direct hosting arrangement should be understood as an infrastructure characteristic rather than a legitimacy determination.

Closing Assessment

Standard browsing, login, account actions, and ordinary service transactions are appropriate; formal authorization checks remain suitable for institutional or regulated engagements.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of telecom.kz.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about telecom.kz at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
