

Is telecontact.ma legit? TrustSniffer's high-trust assessment: 100/100

telecontact.ma

Verdict

100

OUT OF 100

HIGH TRUST

telecontact.ma appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-04 by automated analysis. Classification confidence 75%.

What this site appears to be

French-language homepage for Telecontact.ma, a Moroccan yellow-pages-style directory that helps users find businesses, pharmacies, events, reviews, and news while offering businesses paid visibility, listing management, advertising, and lead-generation services.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Telecontact.ma is an established Moroccan business directory that enables visitors to search for companies, brands, pharmacies, and local services, while generating revenue through promoted listings, advertising, lead generation, and profile-management services for businesses.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or confirmed malicious reputation findings were observed. The ordinary member-login facility is consistent with the site's client-account function: its password form has no untrusted destination, and behavioral testing found no hidden forms, credential forwarding, cloaking, clipboard interference, or wallet-related activity. One external reputation engine returned an isolated suspicious classification, but this is outweighed by the absence of malicious classifications, blacklist findings, abuse reports, or matching fraud signatures and does not constitute evidence of impersonation or compromise.

- The homepage presents a visible member sign-in form for the MyTélécontact client area; the form has no untrusted submission destination.
- Interactive testing of the homepage completed successfully without hidden forms, suspicious inline scripts, cloaking, external password submission, or wallet-draining behavior.
- The domain has 1,116 archive snapshots spanning 2001–2026 (26 years tracked), with no detected repurposing or semantic drift.
- External reputation telemetry recorded 0 malicious classifications, 1 isolated suspicious classification, no confirmed blacklist finding, and 0 reported infrastructure-abuse incidents.

Regulatory Verification Notes

The site presents a conventional directory and advertising business rather than a regulated financial or investment service, so the absence of a financial license claim is not inherently adverse. The homepage provides access to legal-information links and identifies ordinary commercial functions, although the supplied page evidence does not contain the detailed text of those legal materials. Domain registration identifies EDICOM as the owner and WANA CORPORATE as the registrar, providing concrete administrative alignment with a long-established web presence. No matching broker-reputation record was identified, which is unsurprising for the stated business model and carries no adverse regulatory implication.

- The homepage describes business-search, quotation-request, company-registration, listing-enrichment, and paid-visibility functions.

- The homepage provides legal-information links and displays a physical-address disclosure.
- The domain was registered on 29 January 2003 (~23.5 years old), is registered to EDICOM through WANA CORPORATE, and expires on 29 January 2027.

What to Verify Next

Organizations purchasing advertising or enhanced listings should confirm the current contracting entity, service scope, pricing, renewal terms, billing arrangements, and profile-administration rights in the applicable legal and commercial documents. Account administrators should also confirm official support channels through independently obtained corporate records and apply normal organizational controls for password management and payment approval.

- The homepage invites businesses to register, enhance their profiles, request quotations, and purchase greater visibility, making contractual and billing review relevant to commercial customers.
- The homepage includes client-account access and a password-recovery function, supporting the use of standard account-governance controls.
- Cookie-consent, personalized-advertising, and traffic-analytics disclosures are presented during browser interaction.

Summary Verdict

Telecontact.ma is a legitimate, established, and trustworthy business-directory website. Its sustained operating history, coherent commercial purpose, clean behavioral profile, and broadly favorable external reputation converge strongly in support of normal interaction, including account login and standard use.

Infrastructure Integrity

The site is served directly from a resolved French hosting address operated by CYLLENE ITS SAS, without a detected CDN or WAF layer. Direct origin visibility is a conventional hosting posture rather than evidence of abuse; the identified network, valid transport encryption, and absence of infrastructure-abuse reports provide reasonable technical assurance, while infrastructure alone is not proof of legitimacy.

- The hosting infrastructure resolves to 89.248.208.53 in France and is served from AS34993 (ODISO-AS – CYLLENE ITS SAS, FR).
- The site uses a DV TLS certificate issued by YE2, valid until 30 September 2026.
- Infrastructure analysis identified one likely origin address and no CDN edge addresses.

Closing Assessment

Prospective visitors may use the directory and its standard account functions normally; organizations entering paid arrangements should apply routine procurement, account-security, and payment-authorization controls.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status

UNVERIFIED

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of telecontact.ma.

- The request stayed on telecontact.ma. It was not redirected to another domain. [CLEAR](#)
- Registration is published under WANA CORPORATE. [CLEAR](#)
- DNS for this domain is served by wanacorp.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-01-29. [NOTED](#)
- The earliest public archive of this site is from 2001-04-10. [CLEAR](#)
- It is hosted on ODISO-AS, from a server in FR. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about telecontact.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
