

Is teleport.media legit? TrustSniffer's high-trust assessment: 100/100

teleport.media

Verdict

100

OUT OF 100

HIGH TRUST

teleport.media appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

Marketing/homepage for Teleport Media offering a peer-to-peer CDN targeted at OTT/video streaming customers. Contains product benefits, case studies, white papers, and contact/consultation forms. Corporate contact and address provided.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Teleport.media is a marketing and product website for Teleport Media, presenting a peer-to-peer content delivery network for OTT video streaming. It targets online television, sports broadcasting, and OTT solution providers with a SaaS and enterprise-contract model, promoting audience scaling, reduced delivery costs, high-quality playback, and content-protection capabilities.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, malicious-content, or confirmed reputational threat indicators. The homepage presents a coherent B2B technology proposition rather than financial solicitation or credential-harvesting mechanics, and its claims about scaling to millions of viewers, reducing CDN costs, and protecting content with DRM, encryption, forensic watermarks, and patented technology are framed as commercial product claims. The domain's registration continuity, sustained archival presence, clean external reputation, and strong global traffic footprint are consistent with an established website, although the real-world operator identity remains independently unverified.

EVIDENCE

- The domain was registered in 2015 and is approximately 10.96 years old.
- The site has 77 archive snapshots spanning 2016–2026, with 11 years tracked.
- The homepage was classified as a professional SaaS/CDN marketing page with no detected phishing, brand-impersonation, crypto, wallet, or hidden-form indicators.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with the domain ranked 5466 globally and within the top one million sites.

Regulatory Verification Notes

The site appears to sell enterprise software and content-delivery services rather than a financial or otherwise visibly regulated product. Corporate contact and address details are presented, but the available evidence does not independently verify the operating legal entity. No regulatory license claim or registration number is shown in the supplied site content; this is a disclosure and verification gap, not evidence of fraud. The domain is registered through Ascio Technologies, Inc. Danmark – Filial af Ascio Technologies, Inc. USA, and the site uses a valid domain-validated certificate issued by YR1.

EVIDENCE

- The homepage and contact materials identify a corporate contact route and business address.
- Domain registrar: Ascio Technologies, Inc. Danmark - Filial af Ascio technologies, Inc. USA.
- TLS certificate: issuer YR1, validation level DV, valid to 2026-10-10T04:33:43+00:00.
- No license authority or license number is stated in the supplied business-model evidence.

What to Verify Next

Before credential submission or payment under a commercial agreement, the contracting entity should be matched independently to an official corporate registry and to the entity named in the service agreement. Pricing, service levels, cancellation or refund provisions, data-processing responsibilities, and payment protections should be reviewed through the formal commercial documentation; any sector-specific licensing requirement should be confirmed with the relevant registry if the proposed use extends beyond ordinary CDN services.

EVIDENCE

- The observed business model is a free-trial and consultation-led SaaS offering leading to paid subscriptions or enterprise contracts.
- The homepage provides product, use-case, pricing, documentation, and consultation pathways, supporting review of the commercial terms before engagement.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The conclusion concerns the website's observed legitimacy and risk signals; it does not independently prove the identity of the real-world operator.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, which provides a meaningful mitigating layer against direct exposure and common edge-level abuse. The observed origin was not visible in this analysis; the protective configuration should therefore be treated as a security control rather than proof of operator legitimacy.

EVIDENCE

- Observed edge address 185.215.4.48, served through AS57724.
- Hosting organization: DDOS-GUARD - DDOS-GUARD LTD, RU.
- Cloudflare was detected as the CDN/WAF provider, with 1 edge IP and 0 observed origin candidates.

Closing Assessment

Routine browsing and ordinary service evaluation are proportionate to the available risk posture. Before credentials or payment details are used, independent confirmation of the contracting entity, applicable terms, and payment protections remains appropriate.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of teleport.media.

- The request stayed on teleport.media. It was not redirected to another domain. CLEAR
- Registration is published under Ascio Technologies, Inc. Danmark - Filial af Ascio technologies, Inc. USA. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-08-26. NOTED
- The earliest public archive of this site is from 2016-06-15. CLEAR
- It is hosted on DDOS-GUARD, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about teleport.media at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
