- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Telkom University's website is an institutional academic portal presenting information on faculties, degree programmes, admissions, research and innovation, campus services, news, events, and multiple Indonesian campus locations. Its apparent purpose is to support prospective and current students, researchers, staff, and other members of the university community.

Scam/Impersonation Risk

No scam, phishing, malware, blacklist, or brand-impersonation contradictions were observed. The homepage presents a coherent university identity through detailed academic and institutional content, including faculties, programmes, accreditation, leadership, campus information, and admissions; it also links to established social platforms. The available evidence is consistent with an established, apparently legitimate institution, although the real-world operator identity is not independently verified.

EVIDENCE

- The homepage identifies Telkom University and provides extensive faculty, programme, admissions, research, news, and campus-service content.
- The domain was registered on 2012-09-07 and is 13.94 years old; the registrar is PT Cloud Hosting Indonesia.
- The site has 5,000 archive snapshots spanning 2013–2023, covering 11 years with a maximum recorded gap of 1 year.
- External security checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist or phishing finding for the domain.

Regulatory Verification Notes

The site provides institutional material covering its history, organisational structure, leadership, accreditation, academic offerings, and admissions. However, the supplied pages do not present a specific licensing authority or licence number, so regulatory status should be treated as a verification matter rather than assumed from the site's institutional presentation. This is a transparency and verification note, not evidence of impersonation or fraud. The domain's long continuity, substantial historical record, clean external reputation, and established academic content nevertheless support the assessment that the website is apparently legitimate.

EVIDENCE

- The “Tentang” and related institutional pages include university history, vision and mission, organisational structure, leadership, accreditation, and campus information.
- The site does not state a specific licensing authority or licence number in the supplied institutional and admissions content.
- The site's transport encryption uses a DV certificate issued by YE2, valid through 2026-10-14.
- The registered domain uses the academic Indonesian `ac.id` namespace and is hosted through the reputable registrar PT Cloud Hosting Indonesia.

What to Verify Next

Before credential or payment interactions, an institution or payment provider should independently confirm Telkom University's legal and academic standing through the relevant Indonesian higher-education registry. Admissions staff should validate the official contact and payment channels through an independently obtained institutional telephone number or other offline route, and prospective applicants should review the applicable enrolment, refund, and payment-protection terms before transferring funds.

EVIDENCE

- The homepage links to admissions, accreditation, contact, campus-location, and institutional-information sections that can be cross-checked independently.
- The admissions and contact pages provide the primary operational channels that should be validated through an independent route before sensitive transactions.
- The site presents no login form or sensitive data-collection form on the observed homepage.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a low overall risk posture. No scam or impersonation contradictions were identified. The classification is strong, while the connection between the website and a specific real-world operator remains likely rather than independently verified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with all observed addresses belonging to Cloudflare edge servers and no origin-server candidate identified. This reduces direct exposure of the hosting origin and is a mitigating technical control, but it is not proof of institutional legitimacy.

EVIDENCE

- Served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US), registered through ARIN.
- Four observed IP addresses were identified as CDN edge addresses; likely origin IP count was 0.
- Cloudflare CDN and WAF protection were detected across the observed hosting infrastructure.

Closing Assessment

Normal informational browsing is proportionate to the evidence; before submitting credentials or making payments, ordinary independent identity, transaction-term, and payment-protection checks should be completed.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Identity verified on page
- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of telkomuniversity.ac.id.

- The request stayed on telkomuniversity.ac.id. It was not redirected to another domain. CLEAR
- Registration is published under PT Cloud Hosting Indonesia. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-07. NOTED
- The earliest public archive of this site is from 2013-07-23. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about telkomuniversity.ac.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
