

Is termedia.pl legit? TrustSniffer's high-trust assessment: 100/100

termedia.pl

Verdict

100

OUT OF 100

HIGH TRUST

termedia.pl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

Polish medical publisher Termedia presents books, professional articles, and healthcare conferences. The visible material is dominated by a detailed Cookiebot consent inventory covering analytics, advertising, embedded-media, accessibility, security, and social-network services. No evidence of credential harvesting, financial-return promises, crypto solicitation, malware delivery, or brand impersonation is present.

Evidence status and limitations

Evidence completeness: UNKNOWN

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Polish medical publishing and events portal presenting professional articles, medical books, healthcare conferences, and educational content, with a conventional commercial model based on publication sales, event revenue, advertising, and promotional partnerships.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, malicious solicitation, or other scam-related signals were observed. The domain's long operating history, substantial archival record, established traffic footprint, and clean external reputation converge with the homepage's ordinary publishing activity to support the conclusion that this is a legitimate website rather than a recently created or repurposed operation.

- The domain was registered on 9 July 1998 and is approximately 28.09 years old; registration is maintained through nazwa.pl sp. z o.o. and currently expires on 8 July 2027.
- The web archive contains 5,000 snapshots spanning 19 May 2000 to 17 December 2025, representing 26 years of tracked history; no suspicious repurposing or semantic drift was established.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, no abuse reports, and no confirmed threat-list match.
- The homepage contained no sensitive or hidden forms, untrusted form destinations, cryptocurrency solicitation, wallet interactions, cloaking, or suspicious inline scripts.

Regulatory Verification Notes

The observed business is medical publishing, ecommerce, and event provision rather than a regulated financial or investment service, so the absence of a financial-services licence claim is consistent with the activity presented. The supplied homepage material does not establish the completeness of corporate, consumer-contract, or editorial disclosures across the wider site. From a privacy perspective, the consent interface transparently identifies extensive analytics, advertising, social-media, and embedded-content integrations; these are conventional commercial tracking practices but remain relevant to institutional privacy review.

- The homepage identifies the portal as “Wydawnictwo Medyczne Termedia” and describes medical books, articles, and conferences without investment-return, brokerage, or crypto-related claims.
- The consent inventory identifies Cookiebot, Google Analytics, Microsoft Clarity, Disqus, Issuu, Vimeo, SoundCloud, and UserWay among the site's third-party services.
- The site is served from AS31229 by PL-BEYOND-AS — Beyond.pl sp. z o.o. in Poland.

- Transport encryption uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid until 4 March 2027.

What to Verify Next

Institutional onboarding should confirm the contracting entity, applicable purchase or event terms, invoicing details, cancellation provisions, and privacy-controller information on the relevant transaction pages. Users with restrictive privacy requirements should review consent choices before enabling optional analytics, advertising, or embedded-media services. These are routine procurement and privacy checks, not indicators of suspected fraud.

- The homepage presents multiple commercial channels—publication sales, conference participation, advertising, and promotional partnerships—whose applicable contractual terms may differ.
- The consent banner separates necessary, preference, statistics, and marketing categories and provides granular service details.
- The homepage links to established external publishing, discussion, media, social-network, accessibility, and delivery services, making third-party data handling relevant to privacy assessment.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence across provenance, reputation, content, and technical security signals. No contradictory evidence undermines its stated identity or ordinary commercial purpose, and normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to a single likely origin address rather than operating behind a detected CDN or WAF. Its Polish hosting environment is identified and its transport encryption is valid; this constitutes sound baseline infrastructure integrity, although infrastructure controls alone are not proof of legitimacy.

Closing Assessment

Prospective users and institutional counterparties may engage normally, applying standard procurement, privacy, and transaction controls appropriate to a medical publishing and events provider.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [termedia.pl](#).

- The request stayed on [termedia.pl](#). It was not redirected to another domain. CLEAR
- Registration is published under [nazwa.pl sp. z o.o.](#). CLEAR
- DNS for this domain is served by [azure-dns.com](#), across 4 name servers. NOTED
- The registration is paid up to 2027-07-08. NOTED
- The earliest public archive of this site is from 2000-05-19. CLEAR
- It is hosted on [PL-BEYOND-AS](#), from a server in [PL](#). NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [termedia.pl](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
