What territoriaconsultores.cl served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents itself as Territoria Consultores, a Chilean business consultancy offering territorial development, sustainable tourism, social and community programmes, training, ESG and environmental advisory services to public- and private-sector clients. Its apparent business model is project-based consulting and institutional service delivery, supported by case studies, client references, office locations and contact information.

Scam/Impersonation Risk

The site's visible content is internally coherent with a professional Chilean consultancy: the homepage describes multidisciplinary advisory work, reports activity since 2009, and links to services, cases, testimonials and contact pages. Its long-established registration and sustained archival presence also support continuity of the domain and do not indicate a recent repurposing. However, this positive presentation is materially outweighed by confirmed external threat detections: the domain is blacklisted, 13 evaluations classified it as malicious, and one additional evaluation was suspicious, with detections from Fortinet, Kaspersky and Sophos. The available

evidence does not establish a specific impersonated brand or conflicting legal identities, but the confirmed blacklist and malicious detections create a severe risk for sensitive interaction, including authentication, credential submission and financial activity.

EVIDENCE

- The homepage presents Territoria Consultores as a Chilean consultancy founded in 2009, with services, client-oriented project work and links to supporting business pages.
- Domain registration: 2010-07-20; age 16.09 years.
- Web archive: 349 snapshots spanning 2013–2026, covering 14 tracked years.
- External reputation telemetry records 13 malicious and 1 suspicious detections, including Fortinet, Kaspersky and Sophos; blacklist status is confirmed.

Regulatory Verification Notes

The site identifies its apparent business as consulting rather than a financial, investment or other regulated service. Its pages state that it acts as an intermediary operator for SERCOTEC in the O'Higgins and Valparaíso regions, but the supplied evidence does not independently verify that institutional role. No licence number or regulatory registration is presented in the available site findings; this is a verification gap rather than, by itself, evidence of fraud. Identity verification remains incomplete, so the on-site presentation should not be treated as conclusive proof of the real-world operator. The site's transport security and hosting details are technically established, but those controls do not validate corporate standing or regulatory authority.

EVIDENCE

- The homepage and "About" content identify the business as Territoria Consultores and describe consulting for companies, institutions and communities.
- The site claims SERCOTEC intermediary-operator status in O'Higgins and Valparaíso; no independent confirmation is supplied.
- Hosted on AS52368 (ZAM LTDA., CL).
- TLS certificate: issuer YR2, DV validation, valid to 2026-10-11T18:02:35+00:00.

What to Verify Next

Before any sensitive interaction, an organisation should independently confirm the claimed SERCOTEC relationship with SERCOTEC using contact details obtained from an official source rather than relying solely on the website. The legal entity, representatives, office locations and contracting details should be matched against authoritative Chilean corporate or public-sector records. Any proposed engagement should also use independently sourced contact channels and documented contractual, invoicing and payment arrangements, with the destination account verified before funds or confidential information are exchanged.

EVIDENCE

- The “About” page states that the firm was founded in 2009 and describes its regional operating history.
- The “Contact” page supplies contact details and office-location information for independent cross-checking.
- The services and cases pages describe the consulting scope and claimed institutional work that should be matched to supporting records.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. Although the site’s business presentation, domain continuity and technical operation are consistent with an established consultancy, confirmed malicious detections and blacklist status dominate the assessment. The operator’s real-world identity and claimed institutional relationship therefore remain unverified.

Infrastructure Integrity

The site resolves directly to a single identified hosting address on AS52368, operated by ZAM LTDA. in Chile, with no CDN or WAF detected. A valid DV TLS certificate provides transport encryption, but the direct hosting arrangement and certificate are mitigating technical facts only and do not offset the external reputation findings.

Closing Assessment

Sensitive actions should be withheld pending independent confirmation of the organisation, its institutional claims and the reason for the external detections; any unavoidable review should remain limited to non-sensitive, read-only browsing.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status

UNVERIFIED

Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [territoriaconsultores.cl](#).

- The request stayed on [territoriaconsultores.cl](#). It was not redirected to another domain. [CLEAR](#)
- Registration is published under NIC Chile. [CLEAR](#)
- DNS for this domain is served by [pymedns.net](#), across 3 name servers. [NOTED](#)
- The registration is paid up to 2029-08-17. [CLEAR](#)
- The earliest public archive of this site is from 2013-05-15. [CLEAR](#)
- It is hosted on AS52368, from a server in CL. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [territoriaconsultores.cl](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
