

Is textitcoin.org safe? TrustSniffer's moderate-trust assessment: 65/100

textitcoin.org

Verdict

65

OUT OF 100

MODERATE TRUST

textitcoin.org is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Safe for Read-Only

Assessed 2026-10-02 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-looking project site for TEXTItcoin (TxC), a Layer-1 proof-of-work cryptocurrency promoted as Texas-rooted and consumer-focused; contains whitepaper, mining/pool info, wallet links, and exchange references. Informational and promotional content but inherently speculative given token nature.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Safe for Read-Only.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

TEXTITcoin.org is a project website for TEXTITcoin (TXC), a Texas-rooted Layer 1 proof-of-work cryptocurrency. It presents the token's technical model, mining and wallet resources, exchange references, team information, legal materials, and community-oriented ecosystem content, with the apparent purpose of supporting TXC adoption and use.

Scam/Impersonation Risk

No confirmed blacklist, phishing, brand-impersonation, or conflicting legal-identity signals were observed. The site's content is consistent with a cryptocurrency project and includes a whitepaper, mining information, wallets, exchange references, terms, privacy materials, team information, and legal updates. However, the model remains inherently speculative, and the blog reports a May 28, 2026 web-wallet exploit that allegedly exfiltrated private keys on unlock before a replacement wallet and migration process were introduced. That disclosure is a material security-history consideration for any wallet-related activity, but it does not by itself establish impersonation or fraud. A separate external detection and abuse reports associated with shared delivery infrastructure are soft reputational signals rather than confirmed evidence that TEXTITcoin itself is malicious.

EVIDENCE

- The homepage describes TXC as a Layer 1, proof-of-work digital currency with three-minute blocks, no pre-mine, and a stated maximum supply of 353 million.
- The blog page reports a May 28, 2026 web-wallet exploit involving private-key exfiltration and states that a clean wallet and migration tool were subsequently provided.
- The domain was registered on 2024-01-05 and is approximately 2.74 years old; the archive records 70 snapshots spanning 2024-03-19 to 2026-09-29 across 3 years.

Regulatory Verification Notes

The site provides dedicated terms, privacy, legal, team, and FAQ pages and presents an apparent project identity associated with TEXTcoin and its named team. The legal page discusses proceedings involving the Texas State Securities Board and the project's position on proof-of-work mining and securities law; those statements are the project's own representations, not independent confirmation of regulatory status. No license or registration number is disclosed in the supplied site evidence, so regulatory standing remains unclear and should be treated as a verification matter rather than as evidence of a scam. The available identity signals support a likely connection to the TEXTcoin project, but they do not independently verify the real-world operating entity.

EVIDENCE

- The legal page describes the TSSB case chronology, procedural challenges, and the project's argument that protocol mining and pool operations do not constitute an offer or sale of securities.
- The terms page identifies third-party exchanges, wallets, block explorers, mining pools, and other tools as external services and directs users to conduct their own diligence.
- The site's transport encryption uses a DV certificate issued by WE1, valid to 2026-12-08.
- The site is served through AS13335, CLOUDFLARENET — Cloudflare, Inc., US; the domain registrar is Amazon Registrar, Inc.

What to Verify Next

Before any high-value or sensitive activity, an independent review should confirm whether the project or any associated service requires authorization in the relevant jurisdiction, validate the current wallet software and migration instructions through independently sourced project channels, and confirm that exchange and pool destinations are the intended official services. Contact details and team claims should also be corroborated through an offline or independently established channel rather than relying solely on site-provided links.

EVIDENCE

- The legal page provides references to regulatory proceedings and linked case materials that can be checked against the relevant regulator's records.
- The FAQ distinguishes custodial wallets from self-custody and explains that private keys control TXC, making wallet provenance and software integrity directly relevant.
- The terms page states that linked exchanges, wallets, pools, and tools were not built by the site operator and should be assessed separately.

Summary Verdict

Available evidence supports a **moderate-trust, apparently established project website** with no observed scam or impersonation contradiction. Its legitimacy is plausible rather than independently proven, and the cryptocurrency business model and reported wallet-security incident warrant a measured posture for sensitive or financial interactions.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure and resolves to the observed Cloudflare edge address 185.158.133.1 in AS13335; no origin candidate was observed. This provides a meaningful exposure-mitigation layer, but CDN protection is an infrastructure safeguard rather than proof of operator legitimacy.

Closing Assessment

The appropriate posture is limited, deliberate engagement: complete independent regulatory, destination, and wallet checks before committing funds, credentials, or other sensitive information.

Written analysis generated 2026-10-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by governance, page content.

01 Governance

- What the site offers, as described on its own pages, limits how high the score can go until more of it can be verified.

Governance rule:gov_business_model_cap

02 Page content

- The page has no description for search engines, which established sites usually provide.
- The page carries none of the structured previews for search and social sharing that established sites usually provide.

Page content rule:PAGE_SEO_NO_STRUCTURED

Signals weighed against the site

- AbuseIPDB: 102 reports on hosting IP 185.158.133.1 (Internet Utilities Europe and Asia Limited, Content Delivery Network), 43% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

- org:Textitcoin
- contact:form
- on_site_identity

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of textitcoin.org.

- The request stayed on textitcoin.org. It was not redirected to another domain. CLEAR
- Registration is published under Amazon Registrar, Inc.. CLEAR
- DNS for this domain is served by awsdns-37.org, across 4 name servers. NOTED
- The registration is paid up to 2027-01-05. NOTED
- The earliest public archive of this site is from 2024-03-19. CLEAR
- It is hosted on CLOUDFLARENET, from a server in AE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about textitcoin.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
