

Is tgju.org legit? TrustSniffer's high-trust assessment: 90/100

tgju.org

Verdict

90
OUT OF 100

HIGH TRUST

tgju.org appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 75%.

What this site appears to be

Persian-language financial news portal offering live prices for gold, coins, currencies, commodities and cryptocurrencies plus market analysis and tools; includes app download links and various market trackers.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Persian-language financial news and market-data portal presenting live prices for gold, coins, currencies, commodities, stock-market indicators, and cryptocurrencies alongside market analysis, news coverage, trackers, app-download links, and related data tools; its apparent model is informational publishing supported by advertising, app distribution, and potentially premium data services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent financial-news and market-data service rather than a credential-harvesting or transaction-ledure, and the available analysis found no phishing indicators, malicious reputation detections, confirmed blacklist hit, or suspected brand impersonation. Its long-running, continuously captured web presence and clean external reputation are consistent with an established website, although the real-world operator remains independently unverified.

EVIDENCE

- The homepage is classified as a financial news and market-data portal, with no login form, sensitive form, hidden form, or untrusted form destination detected.
- The domain was registered on 2011-12-29 and is approximately 14.64 years old.
- Historical coverage records 4,869 archive snapshots spanning 2012–2026, with 15 years tracked.
- External reputation telemetry recorded 0 malicious detections, 0 suspicious detections, no phishing or blacklist hit, and 0 abuse reports.

Regulatory Verification Notes

The site's apparent business is primarily informational: it publishes market prices and financial news rather than presenting itself as a regulated broker, exchange, or investment manager. No license claim, licensing authority, or license number is disclosed in the supplied site evidence; this is a regulatory-transparency gap requiring confirmation if the service is used for any activity beyond viewing information. It is not, by itself, evidence of a scam. A separate broker-intelligence comparison produced no match, which is contextual support but not a legal or regulatory determination. The site's technical service is presented through a known registrar and mainstream transport-encryption infrastructure.

EVIDENCE

- The homepage title and visible content identify coverage of gold, coins, currency rates, cryptocurrencies including Bitcoin, Ethereum, and Tether, commodities, and financial analysis.
- The domain registrar is CSL Computer Service Langenbach GmbH d/b/a joker.com; the recorded expiration date is 2028-12-29.
- The site is served from AS13335, Cloudflare, Inc.; its TLS certificate is issued by WE1 with DV validation and is valid to 2026-11-13.
- No license claim, regulatory authority, or license number was identified in the supplied business and page evidence.

What to Verify Next

Before any credential submission, app installation, paid service, or payment interaction, an independent review should confirm the operating entity, official contact channels, applicable consumer terms, refund or cancellation arrangements, and available payment protections. If the service offers regulated financial execution or advice in the relevant jurisdiction, the claimed operator and authorization status should be checked directly with the appropriate regulator.

EVIDENCE

- The homepage links to app downloads and presents market-data tools, creating an interaction path beyond passive article reading.
- The stated business model includes advertising, app distribution, and potentially premium tools or data services.
- The supplied evidence does not independently connect the website to a verified real-world operator or regulated entity.
- No sensitive form or wallet-connection mechanism was detected during the observed page interaction.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated informational purpose. The absence of observed contradictions materially supports that conclusion, while operator identity should remain treated as unverified rather than proven.

Infrastructure Integrity

The site is protected by Cloudflare's CDN/WAF infrastructure, and all observed addresses were CDN edge servers rather than directly exposed origin infrastructure. This reduces direct exposure of the hosting origin and is a mitigating security measure, but it is not independent proof of legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; credentials, app installations, and payments should follow ordinary independent merchant-identity, terms-and-refund, and payment-protection checks.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tgju.org.

- The request stayed on tgju.org. It was not redirected to another domain. CLEAR
- Registration is published under CSL Computer Service Langenbach GmbH d/b/a joker.com. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED

- The registration is paid up to 2028-12-29. CLEAR
- The earliest public archive of this site is from 2012-01-08. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tgju.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
