- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Tubidy is a free music and video search-and-download portal presenting MP3 and MP4 content, genre browsing, recent releases, device instructions, and FAQ guidance, with an apparent advertising- or traffic-supported entertainment model.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence. The homepage presents a consistent media-download service without phishing indicators, credential-harvesting forms, brand impersonation, wallet behavior, or suspicious browser activity. Its established domain history and clean external reputation further support a legitimate, non-impersonating assessment.

- Domain registration: 2020 (~6.35 years old).
- Archive records: 78 snapshots spanning 2013–2025, covering 13 years.
- The homepage contains no login form, hidden sensitive form, or suspected brand impersonation.
- External reputation checks recorded zero malicious or suspicious detections and zero abuse reports.

Regulatory Verification Notes

The homepage describes free music and video downloads but does not establish licensing, ownership, or content-provenance arrangements in the supplied material. This is a transparency matter relevant to copyright and commercial use, not evidence of impersonation or fraud. No broker-related reputational match was identified.

- Homepage title: "Tubidy — Download MP3 Music and MP4 Videos for Free."
- The homepage offers MP3/MP4 downloads, genre navigation, recent releases, and mobile-use instructions.
- Registered through Openprovider; registrant organization recorded as Tool Domains Ltd.
- Hosted on AS13335 (Cloudflare); TLS certificate issued by WE1, DV validation, valid to 2026-10-29.

What to Verify Next

Before commercial redistribution or other rights-sensitive use, confirm the applicable licensing and content permissions through authoritative copyright or rights-holder channels. Standard account login and ordinary site use require no exceptional restriction based on the supplied evidence.

- The homepage provides extensive content and download functionality but no stated licensing authority or registration number.

- The FAQ and device-instruction content explain usage mechanics but do not establish content ownership.
- The supplied behavioral review recorded two successful runs with no wallet, clipboard-hijacking, cloaking, or hidden-form indicators.

Summary Verdict

The website presents as a legitimate, established, and trustworthy media-download service with no observed scam, phishing, or impersonation contradictions. Its overall posture supports normal interaction and standard use, while rights-related transparency remains the principal business verification consideration.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed traffic served through four Cloudflare edge addresses and no origin candidate identified. This reduces direct origin exposure and provides a meaningful protective layer, although infrastructure protection is mitigating evidence rather than proof of legitimacy.

Closing Assessment

Normal browsing, account login, and standard use are appropriate; any unusually consequential commercial or redistribution activity should follow the same rights and compliance checks applied to comparable media platforms.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of thefoodfundi.co.za.

- The request stayed on thefoodfundi.co.za. It was not redirected to another domain. CLEAR
- Registration is published under Openprovider. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-29. NOTED
- The earliest public archive of this site is from 2013-04-06. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about thefoodfundi.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
