## Full analysis

### Overview

The website is an established UK ecommerce storefront selling branded fragrances and beauty products, supported by product pricing, customer reviews, delivery and returns resources, store-finding services, and a £15 annual MyTFS membership offering discounts, express delivery, samples, and subscription savings.

### Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, malicious behavior, or other scam signals were observed. The storefront's commercial content is coherent with its stated retail purpose, while tested forms and network interactions showed no credential-harvesting or untrusted submission behavior.

- The homepage presented consistent retail inventory from named fragrance brands, with member and non-member prices and extensive product-review counts.
- The homepage contained one newsletter-subscription form; it was not sensitive and had no untrusted destination.
- Interactive testing found no hidden forms, external password submissions, cloaking, suspicious inline scripts, clipboard hijacking, or wallet-related behavior.
- The domain was registered in 2004 and is approximately 22.44 years old; its registration currently extends to 2032 through Fasthosts Internet Ltd [Tag = LIVEDOMAINS].

### Regulatory Verification Notes

The website operates as a conventional retailer rather than a regulated financial or investment service, so no financial-services authorization would ordinarily be expected for the described business model. The supplied homepage links to Terms & Conditions, Privacy Policy, Cookie Policy, delivery, returns, FAQs, and contact resources, although the contents of the legal pages do not provide enough evidence here to independently characterize the operating legal entity. This is a limited disclosure-review point, not evidence of illegitimacy or a conflicting identity.

- The homepage's customer-service navigation includes Contact Us, Terms & Conditions, Privacy Policy, Cookie Policy, Delivery, FAQs, and Returns.
- The homepage offers account, order-tracking, store-finder, favorites, and shopping-bag functions consistent with a developed retail operation.
- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid to 2026-09-20.
- No matching broker profile or financial-regulatory claim was identified in the supplied evidence, consistent with the site's non-financial retail activity.

What to Verify Next

For enhanced procurement, payment-provider, or vendor-onboarding assurance, the operating company name and registered particulars should be confirmed from the linked legal terms and matched against the merchant identity presented during payment. Returns, renewal, cancellation, and member-benefit conditions should also be reviewed before purchasing the annual membership, and official contact channels may be confirmed through an independent corporate source where institutional reliance is required.

- The homepage advertises recurring membership benefits, making the associated renewal and cancellation terms relevant to informed enrollment.
- Separate member and non-member prices are displayed on product listings, providing a basis for confirming how discounts are calculated at checkout.
- Delivery, returns, order tracking, and contact resources are visibly provided on the homepage for pre-purchase review.

Summary Verdict

The website presents as a legitimate, established, and trustworthy retail operation. Its longstanding presence, coherent commercial identity, clean external reputation, stable behavior, and mature customer-service footprint converge strongly in support of normal use, including account login and standard transactions.

Infrastructure Integrity

The website is served through Cloudflare’s mainstream CDN/WAF infrastructure, which reduces direct origin exposure and provides conventional edge-layer protection; this is a mitigating security control rather than independent proof of business legitimacy.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., US).
- All four observed addresses were Cloudflare edge endpoints, with no origin-server candidate exposed during the assessment.

Closing Assessment

Normal browsing, account use, membership enrollment, and ordinary purchases are appropriate, subject to standard consumer review of transaction and subscription terms.

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about thefragranceshop.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
