Full analysis

Overview

The Perfume Shop is an established UK ecommerce and physical retail chain selling perfumes, fragrances, beauty products, gift sets, and related services through online shopping and store-based retail.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent retail identity through product catalogues, store locations, loyalty services, delivery information, account functionality, and legal policies. Its ordinary ecommerce model, clean external reputation, and sustained historical presence support a legitimate business interpretation rather than impersonation or phishing.

Regulatory Verification Notes

The reviewed pages provide company information, customer policies, delivery and collection details, and legal terms appropriate to a consumer retailer. About this assessment

A trust score summarises the evidence TrustSniffer could collect about theperfumeshop.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
