Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Rozgaar is a corporate recruitment and staffing website presenting internships, apprenticeships, direct hiring, contract staffing, job listings, employer testimonials, and contact information, with an apparent business model based on recruitment placement and staffing contracts for employers and candidates.

Scam/Impersonation Risk

The site's page content presents a coherent recruitment business and does not show on-page brand impersonation, conflicting legal identities, login forms, or other page-level fraud indicators. However, this benign presentation is materially outweighed by confirmed external threat signals: the domain is blacklisted, and multiple security-reputation sources recorded malicious or suspicious detections. The available evidence therefore supports a critical sensitive-interaction risk posture despite the absence of an identified identity contradiction or impersonation pattern.

EVIDENCE

- External reputation assessment recorded 10 malicious detections and 1 suspicious detection, including flags from Fortinet and Sophos.
- The domain was identified on two external blacklist sources.
- The homepage was captured successfully and contained no login form, hidden sensitive form, wallet activity, or suspicious browser behavior.
- Domain registration records show registration on 2019-05-29, an age of 7.23 years, and expiry on 2027-05-29.

Regulatory Verification Notes

The website describes internships, apprenticeships, direct hiring, and contract staffing, including claims involving NAPS, NATS, government-recognised apprenticeships, stipend reimbursement, contract drafting, and ROC filing. The reviewed material does not provide a license or registration number establishing a specific regulated status; this is a transparency and verification gap rather than, by itself, proof of fraud. The operator identity remains unverified, and the registration label “Premium Brands” should not be treated as independent confirmation of the business presented on the site. A separate broker-reputation dataset found no matching broker record, which provides limited contextual information and is not a licensing determination.

EVIDENCE

- The homepage describes Rozgaar as a hiring partner covering internships, apprenticeships, direct hires, and staffing.
- The service content claims registration under the Apprentices Act, 1961 and handling of NAPS/NATS-related processes.
- WHOIS lists organization “Premium Brands” and registrar Endurance International Group India Private Limited.
- Hosted on AS46606 (Unified Layer, US); the site’s TLS certificate is issued by YR1 at DV validation level and is valid to 2026-09-28T10:04:26+00:00.

What to Verify Next

Before any sensitive engagement, independently confirm that the legal entity operating the recruitment service exists under the claimed name and is authorized to conduct the stated employment or apprenticeship activities. Confirm apprenticeship and government-scheme claims with the relevant official registries, and validate the site’s published contact channels through an independently sourced telephone number or institutional directory. Any request for identity documents, employment fees, credentials, or payment details should be assessed only after those checks are completed.

EVIDENCE

- The Contact page supplies a phone number, email address, and street address that can be checked through independent sources.
- The site presents government-scheme and compliance claims that require confirmation with the relevant official authorities.
- The reviewed pages contain service and job information but no sensitive submission form.

Summary Verdict

The website has a critical trust posture for sensitive interactions. Its professional recruitment presentation does not overcome the confirmed external reputation contradictions, and the real-world operator identity is not independently verified.

Infrastructure Integrity

The site resolves directly to a single likely origin IP, with no detected CDN or WAF layer and no edge-IP separation. Its hosting is provided through Unified Layer, which offers ordinary infrastructure context but does not establish legitimacy; the shared-provider attribution also means associated abuse reports should not be interpreted as proof that the website itself generated them.

Closing Assessment

Restrict activity to passive viewing and withhold credentials, identity documents, payments, and other sensitive information unless the operator, authority, and contact channels have been independently cleared.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 3 reports on hosting IP 162.241.85.198 (Unified Layer, Data Center/Web Hosting/Transit), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about therozgaar.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
