Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Thailand-focused news and expatriate-information publication offering breaking and regional reporting, travel and property guides, visa and lifestyle content, lottery results, videos, community links, sponsored material, and paid ad-free subscriptions supported by advertising and referral-based monetization.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or confirmed malicious reputation signals were observed. The conventional login facility is consistent with the publication's subscription model; testing found no hidden forms, cloaking, wallet interaction, clipboard manipulation, or other abuse mechanics. The domain's long operating history, extensive archival record, established global traffic footprint, and clean external reputation converge strongly in support of an authentic publishing operation.

- Domain-registration records show registration through GoDaddy.com, LLC on 2 October 2016, making the domain approximately 9.83 years old; the registrant uses Domains By Proxy, LLC.
- The domain has 5,000 archive snapshots spanning 15 May 2017 to 23 March 2022, representing 6 years of tracked history with no established suspicious repurposing or semantic drift.
- Reputation telemetry recorded no malicious or suspicious detections, no external threat-list hit, and no abuse reports; the domain holds a global traffic rank of 33,946.
- The homepage presents a standard news-portal login and search interface, with no detected brand impersonation, hidden forms, or deceptive browser behavior.

Regulatory Verification Notes

The homepage presents an editorial media and information business rather than a regulated financial-services provider, and it makes no supplied claim of financial authorization that would require validation as part of this assessment. Available evidence does not establish the contents of separate corporate, editorial-governance, privacy, or subscription-terms pages, so no broader conclusion is drawn about those disclosures. No relevant broker-profile match was identified; that is limited third-party context and not a licensing or legal determination.

- The homepage identifies the service as a news and media portal covering Thailand news, politics, business, visas, travel, property, health, lifestyle, and government lottery results.
- The homepage describes ordinary media monetization through advertising, sponsored articles, property-related referrals, and paid ad-free membership.

- The site's hosting infrastructure is served from AS13335 (Cloudflare); its TLS certificate was issued by WE1 with domain validation and is valid until 20 October 2026.
- The homepage provides visible links to established social platforms, including Facebook, X, LinkedIn, YouTube, Instagram, and TikTok.

What to Verify Next

Routine institutional onboarding should confirm the publisher’s contracting entity and applicable subscription terms before procurement or advertising expenditure. Privacy and account-handling terms should be reviewed for alignment with organizational data-protection requirements, while sponsored or referral-based material should be distinguished from independent editorial reporting. Official commercial and support channels may be confirmed through an independent route when establishing a business relationship.

- The homepage offers account login and an ad-free subscription, creating a relevant basis for reviewing account, billing, cancellation, and privacy terms.
- Property-search, visa-services, insurance, hotel, and other commercial categories on the homepage may involve referrals or third-party service relationships.
- Sponsored content is included among the homepage’s stated publication categories, making editorial labeling relevant to enterprise media-consumption controls.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence across historical continuity, audience reach, clean reputation, coherent publishing activity, and normal account functionality. No contradictory risk signals were identified, and normal interaction—including account login and standard use—is appropriate.

Infrastructure Integrity

Cloudflare provides the site’s CDN and WAF layer, with all observed addresses belonging to edge servers rather than the origin host. This architecture reduces direct origin exposure and provides a meaningful security mitigation, although protective infrastructure alone is not evidence of legitimacy.

Closing Assessment

Prospective users may engage with the publication normally; organizations entering paid subscriptions, advertising arrangements, or referral-driven transactions should apply their standard contractual, privacy, and vendor-onboarding controls.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of thethaiger.com.

- The request stayed on thethaiger.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-02. NOTED
- The earliest public archive of this site is from 2017-05-15. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about thethaiger.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
