

Is tiavision.co.za legit? TrustSniffer's high-trust assessment: 90/100

tiavision.co.za

Verdict

90

OUT OF 100

HIGH TRUST

tiavision.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 70%.

What this site appears to be

Tiavision is a South African infrastructure and security services firm (est. 2013) offering open-source production-grade DNS hosting, cybersecurity, managed servers, SaaS/PaaS white-label platforms and AI solutions with contact details and client testimonials.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Tiavision is a South African B2B infrastructure and security services website presenting custom DNS hosting, cybersecurity engineering, managed servers, SaaS/PaaS white-label platforms, and AI solutions for organisations seeking production-grade open-source technology and ongoing technical support.

Scam/Impersonation Risk

No contradictions were observed. The site's corporate-services presentation, dedicated About, Services, Expertise, Testimonials, Contact, Privacy Policy, and Terms pages, together with the absence of login, wallet-connection, payment-capture, or hidden sensitive forms, is consistent with its stated B2B operating model. Available reputation checks found no malicious or suspicious detections, no impersonation indicators, and no confirmed blacklist or phishing signal. The available evidence therefore supports an apparently legitimate, low-risk website, while the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage identifies Tiavision as an "Open-Source Infrastructure & Security" provider and presents a corporate-services navigation structure.
- The site archive records 46 snapshots spanning 2014–2026, with 13 years tracked and a first snapshot on 2014-03-06.
- The registered domain was created on 2013-05-02 and has an age of 13.28 years.

Regulatory Verification Notes

The site describes commercial technology and managed-service offerings rather than presenting itself as a bank, broker, investment provider, or other regulated financial institution. It does not present a licence or registration number on the reviewed pages; this is a disclosure point for ordinary business due diligence, not evidence of deception in the context of the stated infrastructure-services model. The operator identity is not independently verified, so the site's business claims should be treated as evidence-consistent rather than conclusive proof of a legal entity. A page-authority signal is limited, but it does not override the stronger convergence of established content, domain continuity, clean reputation, and stable technical operation.

EVIDENCE

- The Services and Expertise pages describe DNS hosting, cybersecurity engineering, SaaS/PaaS platforms, AI solutions, and managed-server services.
- The site is served through AS329206, Rackzar (Pty) Ltd - Rackzar (Pty) Ltd, ZA.
- The site's TLS certificate is issued by YR1 at DV validation level and is valid until 2026-10-30T21:13:12+00:00.
- The Contact page provides a business telephone channel and an inquiry form without a sensitive-data submission field.

What to Verify Next

Before entering into a material service contract or sharing operational information, an organisation should independently confirm the contracting entity, applicable business registration details, service ownership, data-processing responsibilities, and the commercial terms in the site's legal documents. Any claim that a proposed engagement involves regulated activity should be checked against the relevant South African or other applicable registry. Payment arrangements should be assessed for contractual remedies, invoice authenticity, and available payment protection, with contact channels confirmed through an independent route.

EVIDENCE

- The site links to separate About, Contact, Privacy Policy, and Terms of Service pages.
- The Services page provides the stated scope of commercial offerings against which a proposal can be compared.
- The Contact page supports an inquiry workflow rather than direct account creation or credential submission.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-conflict indicators were observed, although the operator connection is not independently proven.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and the observed address is an edge address associated with AS329206; the origin server was not observable in the analysis. This provides a meaningful exposure-mitigation layer but should be regarded as protective infrastructure rather than proof of legitimacy.

Closing Assessment

Ordinary engagement is proportionate to the assessed posture, subject to standard independent checks of the contracting party, contractual terms, and payment protections before credential or payment interactions.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tiavision.co.za.

- The request stayed on tiavision.co.za. It was not redirected to another domain. CLEAR
- Registration is published under Tiavision (Pty) Ltd. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2029-05-02. CLEAR
- The earliest public archive of this site is from 2014-03-06. CLEAR
- It is hosted on Rackzar (Pty) Ltd, from a server in ZA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tiavision.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
