

Is tickets2fish.com a scam? TrustSniffer's high-risk assessment: 0/100

tickets2fish.com

Verdict

0

OUT OF 100

CRITICAL RISK

tickets2fish.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Site for 'Cabinet Robert', a Strasbourg-based financial training provider offering structured modules, downloadable tools, testimonials, contact details and course/pricing pages. Focus is on practical finance education without promises of investment returns.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Cabinet Robert

FORMATION FINANCIÈRE · STRASBOURG

What tickets2fish.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents itself as “Cabinet Robert,” a Strasbourg-based provider of structured financial education, offering practical modules, downloadable tools, testimonials, contact information, and paid training for individuals and corporate teams; its stated purpose is financial education rather than investment solicitation or promised returns.

Scam/Impersonation Risk

The site’s visible content is comparatively professional and describes financial training without promises of gains, investment returns, or cryptocurrency activity. However, this benign presentation is contradicted by confirmed blacklist status and substantial external malicious detections, including Tier-1 security-provider flags. Repeated hidden-form detections were also recorded during behavioral testing, creating a material concern for sensitive interaction even though no conventional login form, wallet connection, external password submission, or obvious brand-impersonation pattern was observed. The site should therefore be treated as a potentially compromised, repurposed, or otherwise unsafe service despite its stated educational model.

EVIDENCE

- The homepage identifies “Cabinet Robert” and describes structured financial training in Strasbourg, with language stating that the service makes no promise of investment returns.
- Behavioral testing detected hidden forms in both completed runs; no external password forms or wallet-drainer activity were observed.
- External reputation assessment recorded 16 malicious detections and 1 suspicious detection, with two Tier-1 security vendors flagging the domain; the domain was also recorded on confirmed blacklists.
- The domain was registered on 2022-10-28 and is approximately 3.81 years old through the recorded expiry date of 2026-10-28.

Regulatory Verification Notes

The site’s apparent business model is paid financial education, not a disclosed regulated investment service. Its pages provide service, pricing, and contact information, but the supplied content does not show a claimed license, registration number, or named regulatory authority. That is a verification gap for a financial-training provider and should not be treated alone as proof of fraud. The real-world operator remains unverified; “Cabinet Robert” is an on-site presentation rather than independently established identity evidence. Registration is recorded through Hosting Concepts B.V. d/b/a Registrar.eu, while the transport certificate provides domain validation only.

EVIDENCE

- The homepage, training pages, and pricing content describe in-person and online financial courses and workshops rather than investment products.
- The supplied business and legal-content findings contain no license claim, license number, or regulatory authority.
- The domain is registered through Hosting Concepts B.V. d/b/a Registrar.eu.
- The site uses a DV TLS certificate issued by YR2, valid to 2026-11-01.

What to Verify Next

Before any engagement, an independent check should confirm the legal entity behind “Cabinet Robert,” the provider’s authority to deliver any financial education that could constitute regulated advice, and the enforceability of its course, refund, and invoicing terms. Contact details should be validated through an independent route, and any payment destination should be checked against the verified legal entity rather than relying solely on the website. Given the security findings, credentials and financial information should not be submitted until those checks and a fresh security assessment establish that the site is safe for the intended interaction.

EVIDENCE

- The site exposes separate About, Contact, Forms, and Pricing navigation paths that can be used to compare its stated identity and commercial terms.
- The training description refers to both individual participants and corporate teams, so the contracting party and invoicing entity should be confirmed for either engagement type.
- The page analysis found no login form and no sensitive form submission to an untrusted external destination, but this does not resolve the separately observed hidden-form detections.

Summary Verdict

The overall posture is **critical trust risk**. The site's coherent educational presentation is insufficient to overcome the confirmed external threat and blacklist contradictions, and the operator's real-world identity is not independently verified.

Infrastructure Integrity

The site is fronted by a CDN/WAF layer, which provides some exposure mitigation but is only a defensive infrastructure characteristic and does not establish legitimacy. All observed traffic resolved to an edge address, with no origin candidate visible in the supplied analysis.

EVIDENCE

- The observed edge address is 138.197.142.126 on AS14061, operated by DIGITALOCEAN-ASN – DigitalOcean, LLC, US.
- The infrastructure assessment identifies CDN/WAF protection and 1 observed edge IP, with 0 likely origin IPs.
- The hosting network is registered through ARIN in the US.

Closing Assessment

The appropriate institutional posture is to suspend sensitive interaction and require independent identity, regulatory, payment, and security validation before engagement.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page contained a form a visitor cannot see.

Behaviour in a sandbox rule:BEHAV_HIDDEN_FORMS

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tickets2fish.com.

- The request stayed on tickets2fish.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Hosting Concepts B.V. d/b/a Registrar.eu. [CLEAR](#)
- DNS for this domain is served by stackdns.com, across 4 name servers. [NOTED](#)
- The registration is paid up to 2026-10-28. [NOTED](#)
- The earliest public archive of this site is from 2011-02-10. [CLEAR](#)
- It is hosted on DIGITALOCEAN-ASN, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tickets2fish.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
