Full analysis

Overview

This website is a Spanish-language retail storefront branded “Tienda Newsan,” presenting electronics, appliances, climate-control products, televisions, mobile devices, home goods, promotions, product pricing, customer accounts, and online purchasing functionality. Its apparent business model is direct e-commerce sales, including standard checkout and installment-payment options.

Scam/Impersonation Risk

No contradictions were observed: the available evidence identifies no phishing, impersonation, blacklist, or malicious-reputation signal. The storefront’s product catalogue, pricing, promotional content, and customer-account functionality are coherent with a conventional retail operation, while behavioral review found no cloaking, hidden forms, wallet activity, credential redirection, or other high-risk abuse pattern. The real-world operator remains independently unverified, so the site should be treated as apparently legitimate rather than as identity-proven.

EVIDENCE

- The homepage presents a substantive Spanish-language retail catalogue covering electronics, appliances, mobility, and household goods.
- The site’s archive records show sustained continuity rather than suspicious repurposing: 104 snapshots from 2022-11-17 through 2026-06-10, spanning 5 tracked years.
- External reputation checks recorded 0 malicious findings, 0 suspicious findings, and no blacklist or phishing result for the domain.

Regulatory Verification Notes

The available evidence is consistent with an established retail website, but it does not independently verify the operating entity or establish any regulated status. The registration record names NEWSAN SOCIEDAD ANONIMA and lists nicar as registrar; this supports an apparent association, not proof that the website is operated by that entity. No licence or registration number is claimed on the supplied site content, which is a transparency item to clarify if a transaction involves a regulated financial or credit service; it is not, by itself, evidence of deception. A known third-party broker dataset produced no match, but that is contextual reputational information rather than a licensing determination.

EVIDENCE

- The domain registration record lists NEWSAN SOCIEDAD ANONIMA as the registrant and nicar as registrar.
- The domain was registered on 2013-12-19 and has an age of 12.65 years.
- The site is served from AS396982, Google Cloud Platform / Google LLC, US.
- The transport certificate is issued by WR3, uses DV validation, and is valid until 2026-10-30.

What to Verify Next

Before credential or payment interaction, an independent check should confirm that the merchant name shown during checkout corresponds to the intended legal seller, that applicable returns and warranty terms are available, and that the selected payment method provides appropriate consumer protection. Any claimed instalment, warranty, insurance, or other partner service should be confirmed through the relevant provider independently of the storefront. Official support and contact channels should also be confirmed through an independent route before resolving account or payment issues.

EVIDENCE

- The site analysis identifies standard login, account-creation, password-reset, newsletter, and checkout-related interaction surfaces.
- The business model is classified as direct retail e-commerce with product sales and possible ancillary warranty or insurance services.
- The supplied content contains no reported page-level red flags or detected untrusted form destination.

Summary Verdict

The overall posture is high trust and low risk, with converging evidence of an established, active, and apparently legitimate retail website. No scam or impersonation contradiction was identified, although the available evidence does not independently prove the real-world operator's identity.

Infrastructure Integrity

The site resolves to a single directly hosted endpoint, with no CDN or WAF vendor detected. This provides less edge-layer shielding than a CDN-backed deployment, but the observed infrastructure posture is not itself evidence of malicious activity.

Closing Assessment

Ordinary browsing is proportionate to the evidence; independent merchant, policy, and payment-protection checks should be completed before entering credentials or committing funds.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tiendanewsan.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were

consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
