Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2024.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

The website is a Spanish-language Argentine ecommerce storefront offering OMBU and related workwear, safety footwear, protective accessories, discounted merchandise, instalment payments, cart-based purchasing, delivery calculations, and wholesale quotations for businesses.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, deceptive financial promises, or other fraud signals were observed. The storefront presents coherent product categories, pricing, sizes, stock handling, shipping functions, and account features consistent with an operating retailer. Its long-established registration, continuous recent archival record, established traffic presence, and clean external threat reputation provide convergent evidence that it is legitimate rather than a short-lived imitation or credential-harvesting site.

- Domain registration records identify FAGUAR S.A.C.I. as the owner and NIC Argentina (“nicar”) as the registrar; registered 7 November 2014 (~11.74 years old), with expiry on 12 December 2026.
- The website archive contains 31 snapshots spanning 15 April 2024–12 May 2026 (3 years tracked), with no detected repurposing or semantic drift.
- External threat checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, and no matching threat signatures.
- The homepage contained no hidden forms, external password forms, wallet interactions, clipboard hijacking, cloaking, or suspicious inline scripts.

Regulatory Verification Notes

The available homepage identifies the trading brand as Tienda Ombu, while the domain registration identifies FAGUAR S.A.C.I.; these are complementary brand and registrant references, not conflicting legal identities. No regulated financial or investment activity is presented, so the absence of a financial-services licence claim is appropriate to the observed retail model. The supplied page evidence does not establish whether dedicated terms, privacy, returns, or corporate-identification pages provide further legal particulars; this is a minor disclosure-review point rather than evidence of illegitimacy. No corresponding broker profile was identified, which has no adverse significance for a workwear retailer.

- The homepage title and navigation consistently present “Tienda Ombu” as the retail brand.
- The homepage displays prices in Argentine pesos and provides ordinary retail functions for checkout, delivery calculation, account creation, and commercial quotation requests.

- Hosting telemetry records AS273584, operated by LINKED STORE BRASIL CRIACAO E DESENVOL DE SOFTWARE in Brazil.
- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid until 17 October 2026.

What to Verify Next

Before procurement or material wholesale commitments, the contracting party should be matched to FAGUAR S.A.C.I., and the applicable invoice, return, warranty, delivery, and privacy terms should be retained with the transaction record. Payment instructions and official contact channels should be confirmed through the storefront's established checkout or another independently validated business channel, particularly where a quotation requests settlement outside the normal cart process.

- The homepage provides a separate “Empresas | Mayorista” pathway for business and wholesale enquiries.
- The cart requests a postal code to calculate delivery cost and timing, making the displayed fulfilment terms relevant to transaction approval.
- The account interface supports login and account creation, indicating that the privacy terms governing customer information should form part of routine vendor due diligence.

Summary Verdict

This is a legitimate, established, and trustworthy retail website with a coherent commercial identity and no observed contradictions. The evidence supports normal interaction, including account login, account functions, and standard purchases.

Infrastructure Integrity

The site resolves to two likely origin addresses without a detected CDN or WAF edge layer. Direct origin visibility is a conventional hosting configuration and, in this case, is not accompanied by fast-flux abuse, cloaking, or other confirmed infrastructure threats; infrastructure protection should nevertheless be viewed as a mitigating operational factor rather than independent proof of legitimacy.

Closing Assessment

Prospective customers may use the site normally, while organizations undertaking material procurement should apply their standard vendor-onboarding and transaction-record controls.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tiendaambu.com.ar.

- The request stayed on tiendaambu.com.ar. It was not redirected to another domain. CLEAR
- Registration is published under nicar. CLEAR
- DNS for this domain is served by awsdns-29.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-12. NOTED
- The earliest public archive of this site is from 2024-04-15. CLEAR
- It is hosted on AS273584, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tiendaambu.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
