

Is tilibraexpress.com.br legit? TrustSniffer's high-trust assessment: 100/100

tilibraexpress.com.br

Verdict

100
OUT OF 100
HIGH TRUST

tilibraexpress.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not ScamLow Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 65%.

WHAT THIS SITE APPEARS TO BE

Portuguese-language Tilibra Express retail homepage offering stationery, school, art, office, computing, and organizational products. It presents a broad product catalog with BRL prices, discounts, installment options, account registration, stock notifications, promotions, and newsletter enrollment.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Portuguese-language ecommerce storefront operated under the Tilibra Express brand, offering stationery, school, office, art, computing, and organizational products to consumers through conventional catalogue sales.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or other scam indicators were observed. The site presents an internally coherent retail operation, while its long-standing domain and continuous historical presence provide strong provenance. External threat-reputation checks were clean, and interactive testing found no credential diversion, cloaking, wallet-related behavior, or suspicious outbound activity.

- The domain registration record identifies TILIBRA PRODUTOS DE PAPELARIA LTDA as the owner and shows registration in 2015 (~10.98 years old).
- The web archive contains 380 snapshots spanning 2016–2025 (10 years tracked), with no suspicious repurposing or semantic drift identified.
- Reputation telemetry recorded 0 malicious and 0 suspicious detections, no safe-browsing alert, no external blacklist finding, and 0 abuse reports.
- Testing of the homepage completed 2 successful runs and detected no hidden forms, external posts, non-whitelisted external requests, cloaking, clipboard interference, or suspicious inline scripts.

Regulatory Verification Notes

The observed business model is ordinary retail sale of tangible goods rather than brokerage, investment, lending, or another regulated financial activity. No financial-services licensing claim is presented in the supplied homepage evidence, and no broker-profile match was found; neither point creates a regulatory concern for the identified retail model. The available material does not establish the completeness of corporate, consumer-protection, privacy, returns, or payment disclosures beyond the homepage, so those documents remain the appropriate source for transaction-specific terms.

- The homepage displays a conventional physical-goods catalogue with BRL pricing, discounts, product availability, and installment-payment terms.
- The homepage contains no cryptocurrency, investment, brokerage, or financial-return proposition.
- The site is served from AS16509 (AMAZON-02 — Amazon.com, Inc., US).

- The site's transport encryption uses a DV TLS certificate issued by Amazon RSA 2048 M04, valid to 2026-11-13.

What to Verify Next

For unusually large purchases or institutional procurement, the contracting entity, invoice details, delivery conditions, returns policy, warranty terms, and privacy notice should be checked against the final checkout documentation. Official contact channels may also be confirmed independently where procurement controls require supplier onboarding. Routine customers can otherwise apply normal ecommerce safeguards, including reviewing the final amount and retaining the order confirmation.

- The homepage supports account registration, stock notifications, promotions, and newsletter enrollment, indicating several distinct customer-data interactions.
- The catalogue includes notebooks, planners, art materials, educational supplies, office products, shredders, computer accessories, backpacks, and cases.
- No sensitive form or untrusted form destination was detected in the supplied homepage capture.

Summary Verdict

The site is a legitimate, established, and trustworthy ecommerce operation. Its consistent commercial identity, durable provenance, clean threat reputation, and benign observed behavior support normal interaction, including account login and standard purchases.

Infrastructure Integrity

The site uses mainstream Amazon-hosted content-delivery infrastructure, reducing direct exposure of the application environment and providing a conventional delivery layer. This is a mitigating operational control rather than independent proof of legitimacy.

Closing Assessment

Normal browsing, account use, and standard retail transactions are appropriate, subject to customary ecommerce checks at checkout and proportionate procurement controls for material orders.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tilibraexpress.com.br.

- The request stayed on tilibraexpress.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-49.org, across 4 name servers. NOTED
- The registration is paid up to 2027-08-10. NOTED
- The earliest public archive of this site is from 2016-05-01. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tilibraexpress.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
