No screenshot is retained for this report.

## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

## Full analysis

---

### Overview

The website is an established Indian general-news publishing platform presenting breaking news, analysis, live television, video, and premium content across national and international affairs, business, sport, entertainment, technology, health, education, and lifestyle, with an apparent commercial model based on media-network revenue, advertising, syndication, and premium access.

### Scam/Impersonation Risk

No identity contradictions, phishing behavior, brand impersonation, deceptive financial solicitation, or other scam indicators were observed. The site's long-established domain, substantial global traffic footprint, mature editorial content, and clean external reputation converge strongly in support of authenticity. Interactive testing also found no credential-harvesting forms, cloaking, clipboard interference, or cryptocurrency-wallet activity.

- The domain record shows registration through GoDaddy.com, LLC on 1 July 2008, making the domain approximately 18.1 years old, with registration extending to 1 July 2027.
- The homepage identifies the publication as part of Times Network and presents extensive, coherent editorial coverage rather than a cloned or minimally developed brand façade.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no threat-list hit, no reported IP abuse, and a global traffic rank of 7,481.
- Homepage behavior testing found 0 hidden forms, 0 external password forms, 0 suspicious inline scripts, and no cloaking or sensitive wallet behavior.

### Regulatory Verification Notes

The site presents itself as a news and media publisher, not as a broker or regulated financial-services provider; consequently, the absence of a financial license claim is consistent with its stated function and is not a scam indicator. Its navigation provides company, contact, advertising, regulatory, terms, and privacy pathways, while the organization-validated transport certificate identifies Times Global Broadcasting Company Ltd. No competing legal-entity name was observed in the supplied page evidence, and no third-party broker profile was matched.

- The homepage describes Times Now as part of the established Times Network and exposes standard corporate and policy navigation.
- The site's transport encryption uses an OV certificate issued by DigiCert Global G3 TLS ECC SHA384 2020 CA1 to Times Global Broadcasting Company Ltd, valid until 22 October 2026.

- The homepage contains no financial-license claim, license authority, or license number, consistent with its identified News / Media function.
- The external broker-intelligence dataset returned no matched broker record; this is contextual reputation information rather than a licensing determination.

**What to Verify Next**

For regulated institutional onboarding, procurement personnel should match the contracting entity and payment instructions against executed documentation, review the applicable privacy and terms materials for the intended service, and confirm official commercial or support channels through an independently sourced corporate route. These are ordinary counterparty-control measures rather than responses to a detected security concern.

- The homepage provides dedicated contact and advertising navigation suitable for independently initiating a commercial inquiry.
- Terms, privacy, and regulatory navigation is available for legal and data-governance review.
- No sensitive form or untrusted form destination was detected on the assessed homepage.

**Summary Verdict**

The site is legitimate, established, and trustworthy, with consistent identity, mature publishing activity, strong usage presence, clean reputation findings, and no contradictory threat signals. Normal interaction, including account login and standard use, is appropriate.

**Infrastructure Integrity**

The delivery architecture uses a mainstream CDN/WAF whose edge network limits direct exposure of the origin server; this is a meaningful security mitigation, although protective infrastructure alone is not proof of legitimacy.

- The site is served from AS20940, AKAMAI-ASN1 — Akamai International B.V., with Akamai operating as the observed CDN/WAF.
- All four resolved addresses were CDN edge endpoints, and no origin-server candidate was exposed during the assessment.

**Closing Assessment**

Prospective users may engage with the website normally, while organizations should apply their standard contractual, privacy, and counterparty-validation controls before establishing a formal commercial relationship.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

**What the analysis found**

No rule findings contributed to this verdict.

**Identity verification**

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

### What TrustSniffer observed

First-party facts recorded during the assessment of timesnownews.com.

- The request stayed on timesnownews.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by akam.net, across 6 name servers. NOTED
- The registration is paid up to 2027-07-01. NOTED
- It is hosted on AKAMAI-ASN1, from a server in US. NOTED

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about timesnownews.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
